THE M5000i - THE NEW POWERHOUSE IN THE MARKET

UP TO 100 KM

The mega-powerful M5000i is the latest addition to the familiar i Series, which represents ultimate power and absolute control.

The ultimate power is achieved by the integrated Adaptive Control®. This provides continuous voltage on the fencing, any time anywhere, with the lowest possible electricity consumption. Energizers from the i Series burn away vegetation and ensure maximum power at the end of the fencing.

NOW WITH FREE APP

Get real-time fence information and alerts from your i series energizer. Buy the Wifi module and get the app for free.

THE NEXT GENERATION MULTI-POWER ENERGIZERS!

UNIQUE IN THE MARKET

EASY TO USE

With the arrival of the MBS range we leave the MB energizers in the market way behind. The MBS energizers are 3-in-1 (mains, battery and solar) and come with the famous Gallagher extras.

The energizers all have the unique battery management system, ensuring that the energizer automatically adjusts to the battery's power level. If the energy in the battery decreases, the pulse adjusts to have current on the fencing for as long as possible. It guarantees that you always have current on your fencing

AWARD WINNER - THE INSULATED LINE POST

Super-efficient fencing solution

The insulated line post with clips is the new solution for permanent fencing. Ideal for leased pasture or difficult to reach pasture. This perfectly insulated post can be positioned and removed by hand without any difficulties. It is just as firmly in the ground as a permanent wooden post, because of the solid foot plate. Due to the fibreglass core and the hdpe coating, it is extremely flexible and gives a little when an animal or something else contacts the fencing. The post really is a complete solution with the corresponding clips that are suitable for all types of Gallagher conductors.

WHICH GALLAGHER ENERGIZER DO YOU NEED?

If you need to electrify fencing, Gallagher is the place for you! Will you opt for one of our intelligent energizers from the i Series? A battery solution? Maybe a solar energizer is better suited to your situation. Whatever your needs , we can offer the most reliable solution.

MAINS ENERGIZERS ⊕

Our mains energizers are ideal for permanent fencing. These energizers do not need a battery and work on 230V.

There are different types of mains energizers for different types of fencing. Gallagher has the most suitable energizer for every type of fencing.

MULTI POWER ⊕ ⊟ ☀

The Gallagher Multi Power energizers can be used in every possible way. Would you like to use solar panels, mains or a battery? No problem with these energizers!

SOLAR DEVICES ☀

An energizer that works on solar power is the best choice for remote areas! The battery is charged by sunlight and converts it into electricity. The energizers will continue to run for 3 weeks without any sunlight, do not require maintenance, are environmentally friendly and reliable.

With the new Gallagher Solar range it is even possible to run fencing of up to 30 km on solar power! Absolutely unique in the market! Gallagher through and through!

BATTERY ENERGIZERS ⊟

There may be fencing that cannot be connected to the mains and a battery energizer is a better choice in those situations. These energizers only need a battery and no mains. A number of energizers have a battery-saving option to lengthen the lifespan of the battery significantly.

WEEE DIRECTIVE ⊠

Our energizers are marked in accordance with the European Directive 2012/19/EU regarding Waste Electrical and Electronical Equipment (WEEE Directive). In case you want to dispose the energizer, you may not treat this device as municipal waste. The device should be delivered to the selling point where you have bought the same or returned without charge to Gallagher Europe. By doing so you contribute to the processing of the device in an appropriate manner and to the prevention of possible harmful consequences for the environment and public health.

i SERIES ACCESSORIES

- Energizer controller: Shows all your fence performance information in one convenient separate display box that can be placed up to 50m away from the energizer itself.
- Remote controller: to turn the fence on/off anywhere along the fence line. Integrated fault finder functions lead you to the problem in the fence. 'Inquire' function shows energizer display on the Remote Controller from anywhere on the fence. Compatible with M1800i and M2800i only.
- SMS controller: warns you via a text message when the fence voltage gets below a preset alarm level. In addition, the controller sends updates to your mobile phone.
- Alarm controller: to connect a flashlight and / or siren as an alarm.
- Siren/flashlight: these alarm accessories can be connected (single or multiple) to your mains energizers. They will warn you in case there is a problem with your fence.
- Inverter 12V/230V permanent solar: enables you to power all energizers from a 12V source. Ideal for solar projects where i Series technology is required.
- Inverter 12V/230V battery backup: to connect a 12V battery to the I-series as a back-up. If the mains power is lost this device will switch to battery power and take over, so you will always have a safe electric fence.
- SMS remote controller: to switch all mains energizers on and off by calling or texting with your mobile phone. So if you detect a fence failure, you can instantly repair your fence without getting a shock.
- i Series WiFi Gateway: fence performance in your pocket!
- MB series 12V Battery Backup system: provides an automatic battery supply when there is no mains supply to the energizer.

230V

The Gallagher mains energizers are ideal for permanent fencing; they are top quality and offer plenty of power. All you need to do is connect them to the mains. Gallagher has a suitable solution for every type of fencing.

M1400
The M1400 is a sturdy mains energiser, suitable for fencing of up to 55 km. The energiser has a built-in lightning conductor and a LED bar on the front that shows the voltage of the fencing.

SPECIAL EDITION

324319	M1400	= 1

M950

With the mains energiser M950 you can supply power to fencing of up to 42 km. The energizer has a LED bar on the front that shows the energizer's performance. It also has a built-in lightning conductor.

SPECIAL EDITION

324302	M950	= 1

M650

New in the special edition range, the M650 energizer. The M650 can power fencing of up to 40 km. The energizer has a built-in lightning conductor and a power LED that shows whether the energizer is on or off. The sturdy housing makes this a super energizer at a competitive price.

323329	M650	= 1

M550
A mains energizer with a fantastic price/quality ratio. The M550 has enough power for fencing of up to 35 km. The energizer has a simple, but sturdy housing with a power LED and is fitted with a lightning conductor.

323312	M550	= 1

M350

The smallest mains energizer in the Special edition series. This energizer has a fantastic price/quality ratio. The M350 has enough power for fencing of up to 28 km. The energizer has sturdy housing with a power LED and is fitted with a lightning conductor.

323305	M350	= 1

M160

Easy to operate mains energizer for shorter runs of fencing up to 9 km. Very easy to install. With integrated lightning protection.

| 384306 | M160 | = 1 |

M120

Easy to operate mains equipment for shorter runs of fencing up to 8 km. Very easy to install using the wall clip supplied. With integrated lightning protection.

| 033333 | M120 | = 1 |

M50

Easy to operate mains equipment for short runs of fencing, especially suitable for domestic pets. Very easy to install using the wall clip supplied. With integrated lightning protection.

| 038332 | M50 | = 1 |

Use the Energizers calculator on www. gallagher.eu to calculate which energizer is best suited to your situation.

MULTI POWER

When it comes to flexibility, the Multi-Power energizers are the ideal choice for electric fencing. You can either just use the battery or to combine it with a solar panel to charge the battery. MultiPower energizers can also be connected to the mains by means of the optional mains adapter 12 V/230 V.

MULTI POWER
SWITCHES BETWEEN 12V-230V / SOLAR ENERGY

MBS800

The MBS800 is the most powerful 3-in-1 multi-power energizer. This energizer can be used with 230V, a 12V battery or a solar panel. You can select your source of power with a button with various settings. The energizer is suitable for fencing of up to 40 km and has a battery control indicator. Includes a set of cables.

NEW

390314	MBS800	= 1

MBS400

The MBS400 is a 3-in-1 multi-power energizer. Suitable for use with a solar panel, 12V battery or on 230V. You can select your source of power with a button with various settings. The energizer is suitable for fencing of up to 30 km, it has a battery control function and a built-in lightning conductor. Includes a set of connecting cables.

390307	MBS400	= 1

MBS200

The MBS200 is a 3-in-1 multi-power energizer. Suitable for use with a solar panel, 12V battery or on 230V. The energizer is easy to move and suitable for fencing of up to 20 km. It has a farm-proof design, battery control function and a built-in lightning conductor. Includes a set of connecting cables.

389318	MBS200	= 1

Solar kit + Bracket

The solar-panel kit provides a solution for converting MBS energisers into solar-powered energisers. Due to its intelligent design, the bracket can be attached to a wooden or a steel post.

495415	40W Solarpanel + Bracket	= 1

Solar kit + Bracket

The solar-panel kit provides a solution for converting MBS energisers into solar-powered energisers. Due to its intelligent design, the bracket can be attached to a wooden or a steel post.

495217	20W Solarpanel + Bracket	= 1

MB300

The MB300 is a multi-power energizer for fences of up to 25 km. The energizer works on 230V and with a 12V battery. The design means the energizer is easy to move and it can be fixed in various ways, to a wall for example. The energizer is supplied with a set of cables.

388328	MB300	= 1

MB150

The MB150 is a multi-power energizer that works on 230V, but it can also be used with a 12V battery. The energizer is easy to move, because of its unique design. The LED shows the status of the battery when it is connected. The energizer can power fencing of up to 15 km and comes with a set of connecting cables.

388311	MB150	= 1

MB2800i

The most powerful and most intelligent battery energizer in the market - that is the MB2800i. This strong energizer provides enough power for fencing of up to 80 km. This energizer can be used with a battery and a solar panel or it can be connected to the mains. It is versatile, with absolute control over your fencing! The external displays makes it easy to read the performance of your energizer, and together with the optional accessories you can expand this control even further.

315331	MB2800i	= 1	9.00

MB1800i

The flexibility of a Multi-power energizer, combined with the power and intelligence of the i Series. This intelligent energiser can be used with a battery or it can be connected to the mains. The energizer is suitable for fencing of up to 65 km and provides insight into the fencing's performance with the supplied external display. There are many accessories that can be used to expand your energizer and to have absolute control over your fencing.

315317	MB1800i	= 1

MB1000

The MB1000 is our Multi Power energiser for fences of up to 45 km. This energiser is astrong time-delayed battery energiser with a battery. The MB1000 will integrate well with a solar solution. An optional 230V/15V grid adapter is available to power the product from mains supply if required. (item no 401324)

SOLAR

Are you looking for an energizer that provides free energy and is environmentally friendly too? Go for solar! The Gallagher solar range consists of energizers with an integrated solar panel. We also have individual solar panels and batteries that can be used with 9V/12V energizers.

S400 incl. batteries

The S400 is the powerhouse of solar energisers. With the S400 you can power fencing of up to 30 km without any difficulties. The S400 has a powerful 40W solar panel. With the built-in smart battery management, the energiser works several weeks without daylight. It ensures you have current on your fencing all year round.

033931	12V 7,2Ah Battery S200, S400	= 1

S200 incl. batteries

The S200 is a portable solar energiser, suitable for fencing of up to 20 km. The S200 has a functional 20W solar panel. The energiser is easy to install and still puts enough current on the fencing after several weeks without daylight.

360300	S200 incl. batteries	= 1
730003	Stand for S200 and S400	= 1
033931	12V 7,2Ah Battery S200, S400	= 1

S100 incl. battery

With the S100 it is easy to place fencing of up to 10 km without you having to charge the battery. This powerful energizer works on solar power, is quick to install and easy to transport. No more hassle with empty batteries, with the S100 you still have power, even after 3 weeks without daylight.

| 346304 | S100 incl. battery | = 1 |
| 000442 | Battery S100 | = 1 |

S40 incl. battery

The S40 is the ultimate energiser for fencing of up to 5 km. The energiser is quick to install and easy to transport. The energiser will work for 3 weeks without daylight and has a built-in lightning conductor. This makes the S40 an excellent alternative to a battery-operated system.

| 345307 | S40 incl. battery | = 1 |
| 000459 | 6V 10Ah Battery S40 | = 1 |

S20 incl. battery and mount

Do you regularly move your animals to a different pasture? Your fencing is less than 3 km long? The S20 is your ideal choice. This energisers works on solar power and is environmentally friendly and maintenance free. It is also easy to move and fall-resistant.

| 341323 | S20 incl. battery and mount | = 1 |
| 075188 | 6V 4Ah Battery S10, S16, S20 | = 1 |

S16 incl. battery

The S16 is the ultimate portable Energizer solution, storing 0.1 J and capable of powering up to 1 mile/1,5km or 0.5 hectare of Multi-wire fence. The Energizer comes complete with a rechargeable battery and solar panel. The S16 is quick and easy to install and convenient to transport. This robust and highly portable unit makes a great
alternative to battery-powered systems.

| 341316 | S16 incl. battery | = 1 |
| 075188 | 6V 4Ah Battery S10, S16, S20 | = 1 |

S10 incl. battery

The S10 is the latest solar energizer suitable for the hobby market and short fences <1 km>. The energizer is quick and easy to istall an will work for up to 3 weeks without daylight and is capable to power trough the harshest winsters. The S10 is super tough making it drop resistant and waterproof. The Energizer comes complete with a rechargeable battery and solar panel.

| 341309 | S10 incl. battery | = 1 |
| 075188 | 6V 4Ah Battery S10, S16, S20 | = 1 |

Mount Solar post S10, S16, S20

Install the S10, S16 or S20 energizer on a Gallagher Ring Top Post using the Post Mount.

| 571102 | Mount Solar post S10, S16, S20 | = 1 |

SOLAR PANELS

- Gallagher provides top-quality, tested solar panels with a 2-year warranty on all modules.
- Solar power is environmentally friendly and an increasingly popular economical energy provider.
- All solar panels have a controller that protects the battery against overcharging.
- The range is completed with galvanised brackets, bolts and clamps.
- All solar panels have polycrystalline cells for maximum energy yield.
- Solar panels can be used with mains energizers if you use a converter (item no 069392)..

Solar panels in combination with battery energizers extend the lifespan of your battery
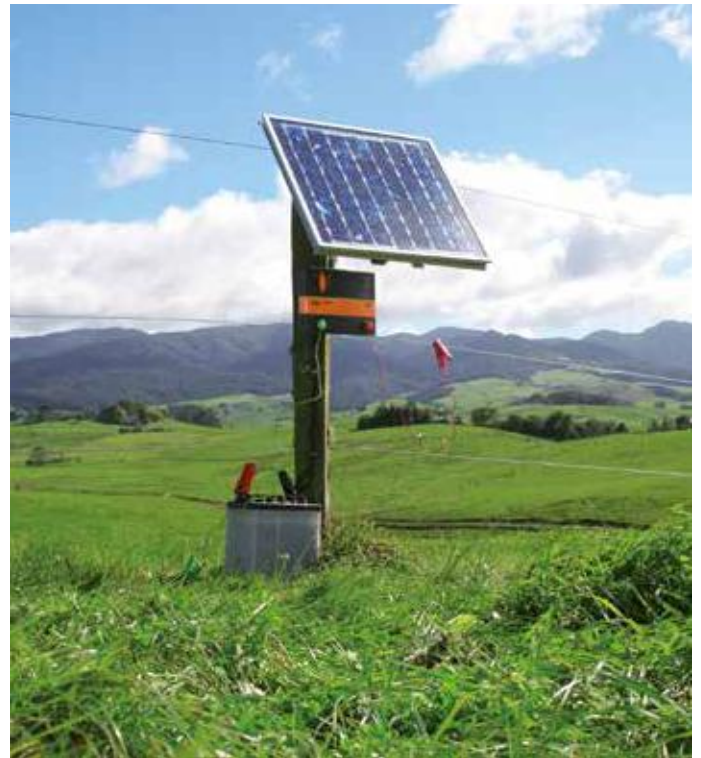

Solar panel

Polycrystalline high-performance solar module with optimised low-light and temperature features. Shock-resistant and hardened solar glass with self-cleaning surface and sturdy aluminium frame. Complete with power cable. Very easy fitting. More than 20 year service life.

Use the Energizers calculator on www. gallagher.eu to calculate which energizer is best suited to your situation.

BATTERY

If you don't have 230V available nearby or if you move your fencing regularly, you can use our 9V or 12V energizers. They don't need mains. To extend the lifespan of a battery, we have energizers with a range of saver settings.

B300

Powerful battery energizer suitable for 12V use. Suitable for fencing up to 30km. Highly visible low battery and fence voltage indicator lights. Four easy to use Battery Save Options which can extend battery life by up to 12 months. Advised battery: Gallagher 12V 85 Ah (not included). Ideal in combination with solar energy.

WHICH TYPE OF FENCING SUITS YOUR ANIMAL

The type of electric fencing that is best for you depends on your situation. Which animals do you keep? Are you looking for permanent or portable fencing? Would you like installation convenience or do you prefer minimal maintenance? All these questions determine your choice. Gallagher has a solution for every situation. We will be pleased to advise you!

FENCING SOLUTIONS

Permanent
Gallagher has permanent fencing available for every type of animal. For example, High Tensile is ideal for cattle or game and lasts up to 25 years. For horses, Gallagher recommends EquiFence. EquiFence is the most durable fencing for horses and is extremely safe because of the protective plastic cable.

Gallagher has the complete range of permanent fencing - from durable insultimber posts, topquality conductors to robust insulators.

Semi-permanent
At times you may wish to put up fencing for a longer period of time without it being permanent, when you lease pasture for example. In those situations Gallagher provides the solution with semi-permanent fencing.

Portable fencing
If you move the animals several times a year, we recommend portable fencing. Gallagher has a solution for every situation. For example, the SmartFence 2.0 is the ideal solution for sheep and goats.

Wolf fencing
Wolves are back after an absence of 150 years. Gallagher offers a number of special wolf-fencing concepts and will advise you without obligation. For more information go to page 78.

10-YEAR SYSTEM WARRANTY

If you use materials recommended by Gallagher: Ecoposts, Insultimber posts, Insulated Line Post, ElectroMax fencing wire, Equifence, reinforced S corner insulators, fixing wires, tension springs, rotating tensioners, Gallagher provides a 10-year system warranty.

Use the Fencing calculator to discover the type of fencing that is best suited to your situation.

GALLAGHER

GALLAGHER SIGNATURE PRODUCTS

SMARTFENCE V2 - 10 POSTS, 4 WIRES AND REELS IN ONE SYSTEM

An ideal portable fence for sheep, goats and cows, it is so quick and easy to set up and is amazingly versatile.

You Tube SMART FENCE
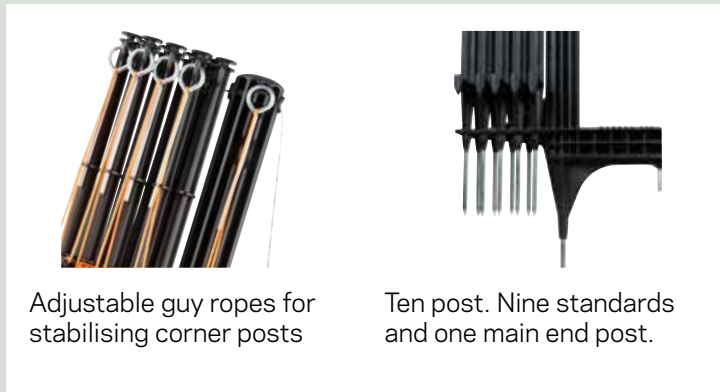

Adjustable guy ropes for stabilising corner posts

Ten post. Nine standards and one main end post.

GALLAGHER PATENTED SOLUTION

All in one, four wire, 100m, fully portable instant fence system.

Very quick and easy to assemble and easy to carry and store away.

Can be connected to any energizer for instant electric fence protection.

Maximum fence length 100 metres

RING TOP POST - EXTREMELY STRONG, ERGONOMIC AND DURABLE FENCE POST

With a head that won't wear through, a strong footplate that won't bend under pressure and a design that reduces tangling, this post combines more strength with less frustration.

You Tube RING TOP POST

GALLAGHER PATENTED SOLUTION

Super tough overmoulded GF nylon head eliminates shorting and prevents wearing through

Long insulation sections strengthen shaft and provide insulation when handling to prevent shocks

Easy to use and install even in hard ground.

Tough unbendable foot plate can withstand 200kg of pressure

35% faster to separate from a bundle

100% Wear Proof, Tangle Proof, Stomp Proof

GALLAGHER SIGNATURE PRODUCTS

XDI RING INSULATOR

A robust ring insulator for fitting plastic wire/cord to wooden posts. Cleverly designed to guarantee no shorts.
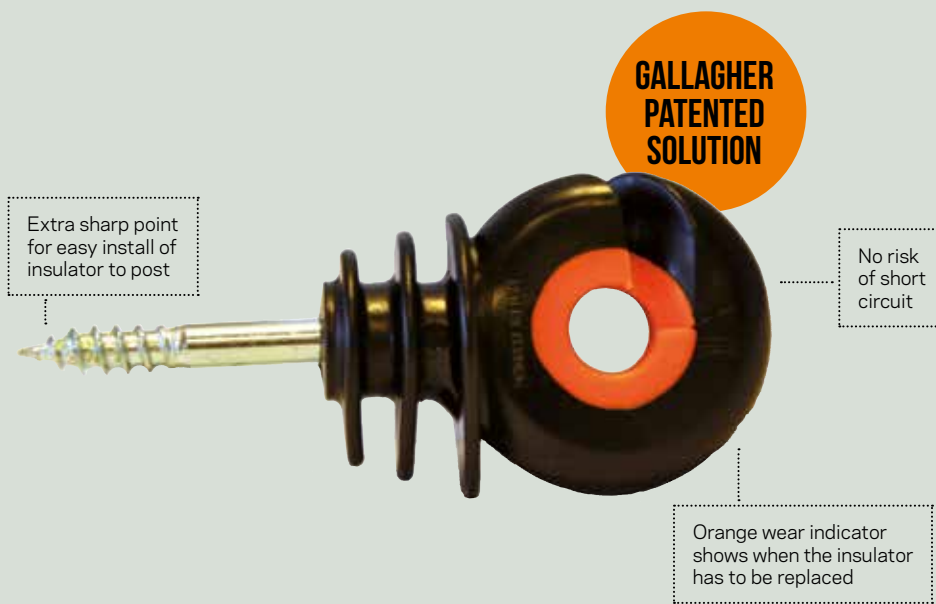

Screw-in aid
A handy, time saving tool that drills in ring and screw insulators.

GALLAGHER PATENTED SOLUTION

Extra sharp point for easy install of insulator to post

No risk of short circuit

Orange wear indicator shows when the insulator has to be replaced

MOVE AN ENTIRE FENCE WITHIN MINUTES USING TUMBLE WHEELS

The strip grazing system, saves time and is easy to use and leads to reduced grazing cycles and higher yields.

You Tube **TUMBLE WHEEL**
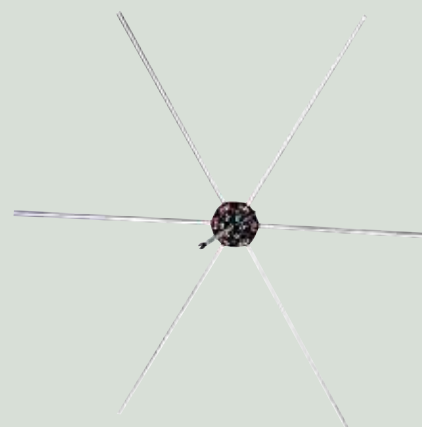

BATTERIES

To power a 9V or 12V energizer, you need a Gallagher battery. A Gallagher 12V energizer and an Optima 12V battery are the ultimate combination! The Optima battery is the most environmentally-friendly solution, because of its durability.

9V Powerpack Alkaline battery

9v

Environmentally friendly alkaline 9V battery for use with 9V battery powered energizers. Alkaline Batteries give you up to 30% better performance than Air Oxygen batteries. Suitable for all Gallagher 9V energizers.

007578	9V/55Ah - 160x110x115mm	= 1

6V Round Alkaline battery

6v

Environmentally friendly alkaline 6 Volt battery 90 Ah for use with battery powered energizers.

055661	6V/90Ah - 180x180x170mm	= 1

THE BENEFITS OF OPTIMA 12V BATTERIES

The optima battery energizer is the most economical and most environmentally-friendly solution, because of its durability.

- Ideal for seasonal use.
- Guaranteed the best purchase.
- Very good charge acceptance.
- Smaller than traditional battery energizers, easy to carry.
- Ideal for winter storage because of its very low self-discharge.
- Cost savings, as it lasts more than twice as long.
- It combines ideally with solar panels, because of its minimal internal resistance.

FENCING SETS

Gallagher offers a wide range of kits - for pets, herons, horses or chickens!! Every kit includes an energizer and they are all easy to install.

Horse kit B60

The starters kit for horses and ponies has everything you need to set up a small paddock for you horse or divide existing ones. Installing is made easy due to the step by step manual. The kit includes: B60 (12V), PowerLine tape 12.5mm (200m), Vario posts 1m (10 pcs.), Screw-in insulator (25 pcs.), Soft touch gate handle, Warning sign, Earth peg, Gate handle anchor (5 pcs.).

072323	12V Horse kit B60	= 1

Poultry kit B60

A complete kit for setting up 50 metres of electric netting 44" (112cm) to keep your poultry in and protect them against predators. Installing is made easy due to a step by step manual. The kit includes: B60 (12V), Poultry netting; double spike, 112cm (50m), Earth peg, Warning sign.

072309	12V Poultry kit B60	= 1

Garden & Pond kit M10

A complete fencing kit to keep pets or small animals in or out. Installing is made easy due to the step by step manual. The kit includes: M10 (230V), Hobby post 0.75m (Terra, 10 pcs.), Insulator (25 pcs.), Vidoflex 3 (Green, 100m), Earth peg, Cable set universal and Warning sign.

072347	230V Garden & Pond kit M10	= 1

Garden & Pond kit B10

A complete fencing kit to keep pets or small animals in or out. Installing is made easy due to the step by step manual. The kit includes: B10 (6x 1,5V), Hobby post 0.75m (Terra, 10 pcs.), Vidoflex 3 (Green, 100m), Insulator (25 pcs.), Earth peg, Warning sign.

072330	9V/12V Garden & Pond kit B10	= 1

Starter kit M10

Kit includes M10 (220V), earthing plate, warning sign, connecting cable and wire clip. To keep in pets (e.g. dog) or deter small predators and other animals (e.g. stone martens, the neighbour's cat, herons, etc.). For gardens smaller than 20 x 60m.

Heron kit M10

A basic system for a fence around your pond. Through this safe, highly effective fence system your pond is a prohibited area for herons, prevents them from eating fish from your pond. The system includes an energizer with wall clip, 10 border posts, 20 clips, 100 meters of black plastic wire and connecting wire. The material is suitable for a 2-wire fence with a total length of 50 meters.

065189	230V Starter kit M10	= 1

021727	230V Heron kit M10	= 1
021789	100m extension wire black	= 1

SnailFence kit M10

Gallaghers "Out of the Box" solution:
to keep out the neighbour's Cat.
to keep Pine Martens out of the attic,
and of course to keep killer snails away from your vegetable garden.
Content: 1x Gallagher M10 Energizer, 1x 20 meter Snail Fence tape, 1x Junctionbox, 200x Screw M3x12, 10mtr Fence cable, 1x Mountingkit, 1x Manual.

075850	230V SnailFence kit M10 / 20m	= 1
077427	Snailfence tape extension kit 20m	= 1

077434	Snailfence tape extension kit 50m	= 1
500041000	Fencing tape/Snailtape Junctionbox	= 1

ELECTRIC FENCING ON A WOODEN FENCE — HOW DOES THAT WORK?

An animal is given shock when it connects the + and – wires. The bottom wire (-) operates as the earthing. When a cat touches the fence with its paws, it will make contact with the earth wire (-). It then closes the circuit by touching the + wire with its head. This produces a shock effect, which makes the cat jump back into the garden.

4.000V IMPULSE TENSION

ELECTRIC FENCING FOR DOMESTIC ANIMALS IS HARMLESS!

An electric fence is based on the principle of a very short pulse being transferred over a wire. This pulse creates a current flow that is conducted over the skin instead of over the body. This ensures that only a shock reaction is created and no harm is done to the animal.

GALLAGHER

SECURITY MEASURES AND TESTERS

Would you like to prevent your animals from escaping as result of a lack of current? Would you like to know what caused the short-circuit in your fencing? Do you want to protect your energizer against a lightning strike? You can with our range of protectors and testers!

Cut out switch

By using a switch, you can divide your fence into several sections and switch them on and off independently of each other. This will also help you trace any faults that occur.

060705	Cut out switch	= 1

Knife Cut-Off Switch

This switch helps you to switch off a part of the fencing for maintenance, for use for passages and gates or when you are looking for faults. The switch also offers the option to divide the fence into different plots. It can also be used to switch the fence on or off on the spot.
The switch is made of stainless steel, visible from a distance, and is supplied with fitting screws.

000770	Knife Cut-Off Switch	= 1

Lightning diverter

The only adjustable lightning diverter on the market, suitable for every energizer. Protects the energizer against damage through lightning by diverting the lightning from the fence to ground (earth). The lightning diverter needs to be mounted between the fence and the energizer. Can withstand multiple lightning strikes.

064802	Lightning diverter	= 1

Flood gate controller

Device especially for ditches that can be mounted on a fence. It stops the current flowing through the bottom line if the water (or another resistance) reaches the bottom wire. The rest of the wires will keep its voltage. Has a resistance of 5600 Ohm.

1506	Controller 5600 Ohm	= 1

Security kit

The Security Kit protects your Maxi master from possible theft. The kit is very easy to install and can be used with all B100, B200, B300, S220 and S230 models.

057002	Security Kit	= 1

FoxlightS

The way to protect your venerable animals against attacks from foxes and other night predators. 9 LED bulbs blink randomly so that the illusion is created for predators that someone is patrolling the area. 6 Volt battery is not included.

061716	FoxlightS	= 1
002169	6V Battery for FoxlightS	= 1

Vandal proof box

A galvanised box that protects battery and fence units. To deter vandals, the box is connected to the energizer and can be locked with a padlock (not included). Fits max.350x160x240mm sized Energizers and max.360x260x230mm sized Battery.
Dimensions incl.foot, 395x295x500mm. Suitable to place on Insultimber post 10x10cm, (not included, partnr. 017904). Ideal for B60/B80/B180/B280 and others.

019410	Electrified Vandal Proof Box	= 1

Energizer and Battery Box

Portable box for electrical equipment and batteries. Maximum size of the battery 34 cm deep x 23 cm wide. Suitable for B60/B80/B180/B280. Other energizers will fit with little changes.

025237	For e.g. B Series	= 1

Gallagher Solarbox

Portable box for energiser, battery and solar panel. Suitable for:
Max. size of energiser:
380x110x300mm (lxwxh).
Max. size of battery:
330x175x240mm (lxwxh).
Gallagher solar panel 10W, 20W and 30Watt.

EU Warning sign

Warning signs must be attached to any electric fence every 50 metres wherever the fence borders a public right of way.

075881	Universal Warning sign	= 1

Electric fence Keyring Beeper

NEW

A very handy and simple tester which can be attached to a key ring. Hold it close to an electric fence and it will give a loud beep if the fence is active.

079667		1

Live fence indicator

The Live fence indicator is fitted to the fence and flashes with each pulse of the energizer so you can see whether the fencing is still working correctly.

511009	Live fence indicator	= 1

Neontester

A convenient tool for checking whether there is sufficient voltage at the electric fence. Not suitable for checking earth systems.
Range: Led 1, 1,0kV > 1,8kV, Led 2, 1,9kV > 2,5kV, Led 3, 2,6kV > 3,8kV, Led 4, 3,9kV > 4,8kV, Led 5, 4,9kV >

015019	Neontester	= 1

Fault Finder

Pinpoints faults quickly and easily whatever type of wire or energizer is used. By simultaneously measuring the current flow and voltage, the Fault Finder will follow the current flow to any one of a series of faults.

509051	Fault Finder	= 1
202068	Battery Fault Finder	= 1

Fence Volt Meter

Supplies exact information on the condition of your fence. Makes targeted trouble shooting very easy. Auto ON/OFF. Helpful tool for checking earthing system. Powered by one 9V battery (a life of 6-12 months). Displays fence voltage from 100V up to 12kV.

015033	Fence Voltmeter	= 1

GUARDING YOUR ANIMALS

The SMS Fence Alarm is a unique plug and play security system for your fence. In comparison with the existing systems, this product is a true breakthrough. It warns you with a text message if there is insufficient voltage (e.g. due to vegetation) or when the fencing is interrupted (e.g. when a gate is opened). You can divide your fence into 2 zones for accurate problem detection. It works for a whole season on 3 standard batteries (not included).

SMS fence alarm

The SMS fence alarm is a unique plug & play security for your fence. Compared with the existing devices this product is in another league. The SMS Fence alarm warns you via SMS if the voltage is too low.

055654	SMS fence alarm	= 1

WHY SHOULD I INSTALL A SMS FENCE ALARM?

- Theft (*).
- Certainty that there is sufficient voltage at the end of the fencing.
- Works independently. Does not have to be connected to the energizer's battery (100% self-sufficiency).
- An immediate alert in the event of theft of the energizer.

(*) As it is vulnerable to theft, it is recommended to install the Fence Alarm separate from the energizer

CONDUCTING WIRES

The conducting wire in electric fencing is of crucial importance, because it transports the current. Even though all conducting wires would appear to be the same, there is a big difference in terms of price and quality. There are also differences in use. The Gallagher range consists of tape, cord, plastic wire, Equifence and High Tensile. Each of them with their different conductivity, durability and design. Make sure you choose the right conducting wire for your use!
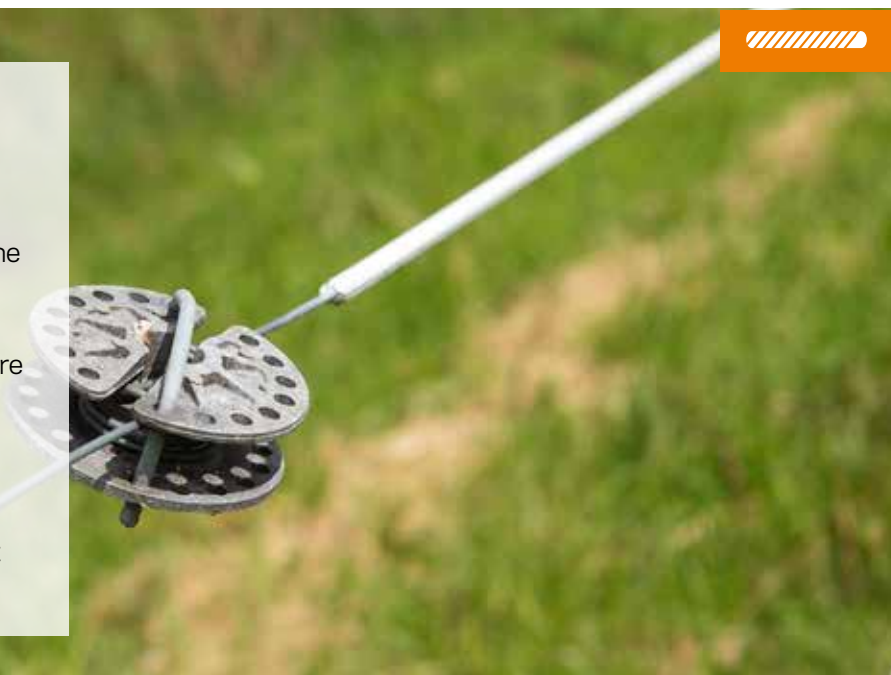

EQUIFENCE

This is the most durable and safe Gallagher fencing for horses. EquiFence consists of an elastic plastic cable with a galvanised core. The 3mm thick plastic casing protects the horse against the zinc-aluminium core. The plastic casing has been made conductive by means of three carbon lines. Fitting a Gallagher EquiFence fencing requires experience, so please contact your Gallagher specialist.

Black carbon lines produce the conductive properties of EquiFence.

Core 2.5 mm aluminiumcoated wire.

UV-resistant.
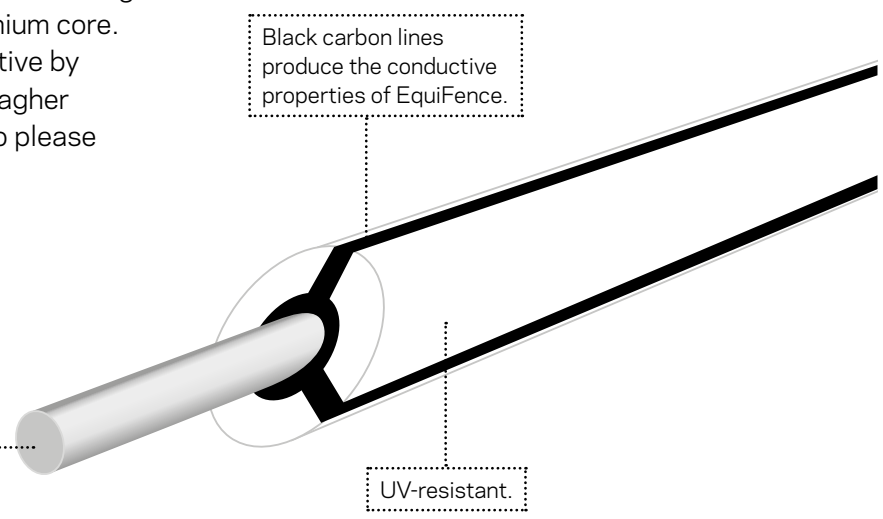

Equifence

The safest solution for your horse. Unique electrically conductive polymer (in black stripes) allows use as electric fence wire. Provides you, in combination with tension springs, ultimate safety for your horse. Total diameter of 7.5mm with a core of 2.5mm high tensile wire.

| 009124 | White - 7,5mm - 250m - 20kg | = 1 |
| 053858 | Terra - 7,5mm - 250m - 20kg | = 1 |

GALLAGHER

HIGH TENSILE

This aluminium-coated wire is many times better than any other steel wire. An aluminium coating on the 2.5mm thick core ensures superior conductivity of up to 15x more than a normal 2.5mm steel wire. The tensile strength of the wire is also particularly high at up to 500 kg. You can tension the wire very tightly and when used in combination with tension springs, you can work with a distance of 20m between posts. This produces considerable cost savings per metre.

Special alloy
With 95% zinc and 5% aluminium.

Anti-rust
Due to the special alloy, its guaranteed life is 10 years.

Better conductivity
More current at the end of the fencing.

Protective packaging.

ELECTROMAX 2.65MM

Particularly suitable for fencing that requires increased conductivity and control.

- 15% better conductivity than standard 2.5mm aluminium-coated wire
- Patented, advanced zinc-alu alloy coating produces superior corrosion resistance.
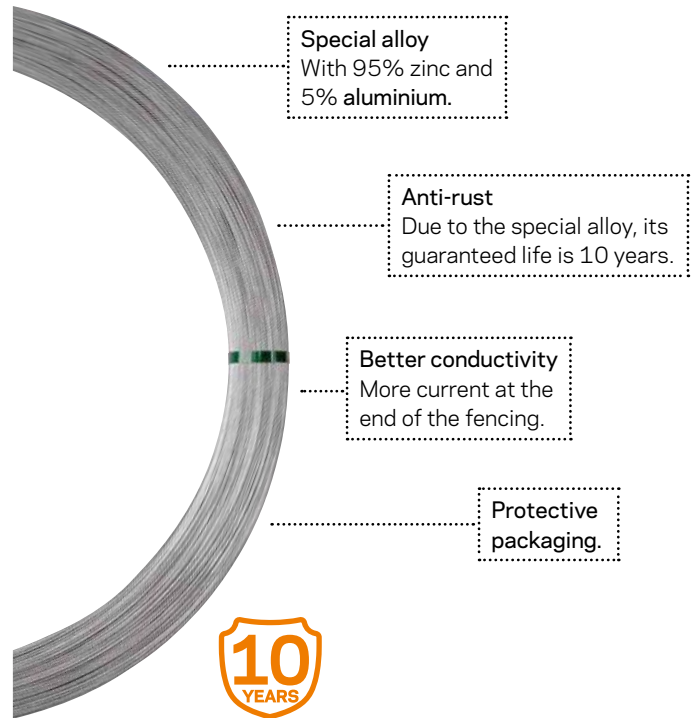

ElectroMax wire

15% more conductive than standard 2,5mm high tensile wire. Carries power further and handles shorts better. Patented zinc-alu alloy outer surface for up to 3 times longer life than standard high tensile wire.

069385	HT - ø2,65mm - 600m - 26kg	= 1

Zinc-alu-mag wire

Steel cored, high tensile fence wire with an aluminium coating for longer life and greater conductivity. Permanent Wire Tensioner and Tension Springs can be used to strain the wire.

039999	HT - ø2,5mm - 625m - 25kg	= 1
077311	HT - ø1,8mm - 1250m - 25kg	= 1
004188	HT - ø1,6mm - 1580m - 25kg	= 1
004195	HT - ø1,6mm - 315m - 5kg	= 1

Zinc-alu-mag wire

Erecting a permanent fence becomes very simple with this aluminised fencing wire. Easier to bend than regular HT wire, but strong enough to keep sheep, cattle or game in/out. Very low resistance, which makes this wire ideal for long fence lines.

060412   MT - ø1,8mm - 500m - 10kg   = 1
Stranded wire

High conductive 7 strand galvanized wire for long portable fences which are affected by growth. To be used with rabbit, fox, pig, and sheep fences.

008759   ø2mm - 200m - 3kg   = 1
007806   ø2mm - 400m - 6kg   = 1

CORD, SOFT VERSION
portable and permanent fencing

Cord is a conductive plastic wire suitable for fencing for cattle and horses. Available in a EconomyLine, PowerLine or TurboLine version.

EconomyLine and PowerLine
For fencing that is shorter than 500 metres. PowerLine conductors are made of durable top-quality plastic and stainless steel.

TurboLine
For fencing that is longer than 500 metres. With a Turboline conductor you are certain you have the absolute top in conductors.

EconomyLine   PowerLine   TurboLine
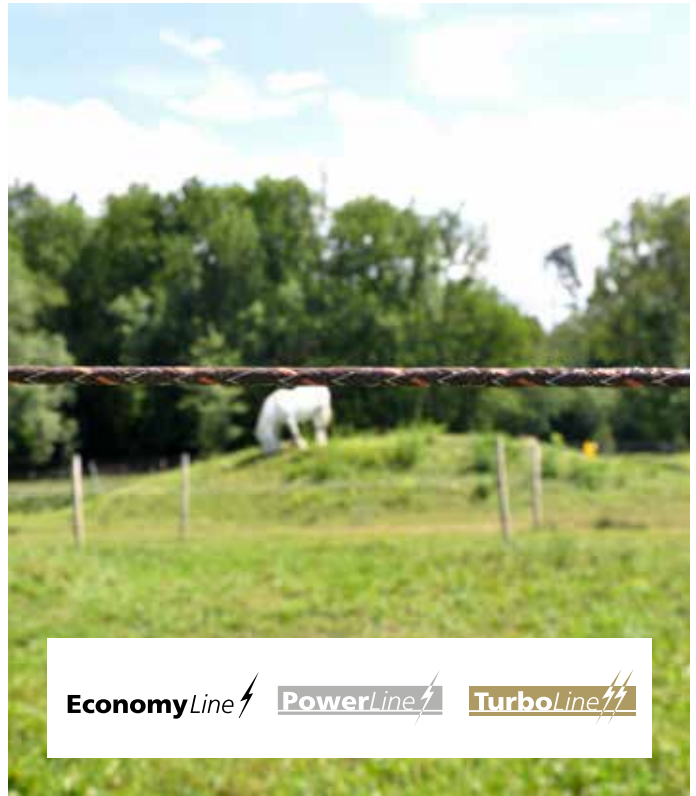

⚡EconomyLine rope

PowerLine Rope for semi permanent fences, suitable for horses and cattle. With 5 stainless steel wires for high conductivity. UV stabilised. Post spacing up to 8m.

⚡PowerLine rope

Braided PowerLine Rope for (semi) permanent fences, suitable for horses and cattle. With 5 stainless steel wires and 1 tinned copper wire for high conductivity. UV stabilised. Post spacing up to 8m.

TAPE
portable and permanent fencing

Tape has reinforced edges. You recognise PowerLine tape by the black side wire. These properties guarantee a longer lifespan for the product. The TurboLine version can be recognised by the red side wire and has a 40x better conductivity because of the light-metal wires that have been incorporated in the conductor.

Economy *Line* ⚡ **Power** *Line* ⚡ **Turbo** *Line* ⚡⚡

EconomyLine and PowerLine
For fencing that is shorter than 500 metres. PowerLine conductors are made of durable top-quality plastic and stainless steel.

TurboLine
For fencing that is longer than 500 metres. With a Turboline conductor you are certain you have the absolute top in conductors.

TurboStar
Extremely strong, super conductive tape for long, permanent equine fencing. Perfectly visible. The sturdy, conductive side wire in the edges provides extra strength. Power guaranteed from beginning to end due to excellent conductivity. The unique composition ensures 40x better conductivity than standard 40mm tape.

⚡ PowerLine tape

Highly visible tape with black reinforced edges. 11 thick stainless steel wires and 1 mixed metal wire for excellent conductivity.

006246	40mm - White - 200m	= 1
060696	40mm - Terra - 200m	= 1

⚡ PowerLine tape

Clearly visible PowerLine Tape with black reinforced edges. Ideal for semi-portable horse fencing. 5 thick stainless steel wires and 1 mixed metal wire for good conductivity. Post spacing up to 5m.

106236	20mm - White - 200m	= 1
062303	12,5mm - White - 100m	= 1
026237	12,5mm - White - 200m	= 1

⚡⚡ TurboLine tape

Strongly conductive tape for portable cattle and horse fencing. Power guaranteed from beginning to end due to vertical stainless-steel wires. The blue colour makes this tape particularly suitable for keeping game animals away from your own animals, because wild animals see the colour blue particularly well.

NEW

079391	12,5mm - Blue - 200m	= 1

⚡⚡ TurboLine tape

Very strong TurboLine Tape with reinforced red edges, suitable for semi-permanent horse fencing. Blends in with the surroundings so it is not so conspicuous. 40 times more conductive than standard Powerline tape. Post spacing up to 6m. Always use TurboLine products if fence > 500m.

007608	20mm - White - 200m	= 1
060702	20mm - Terra - 200m	= 1

⚡⚡ TurboLine tape

Very strong TurboLine Tape with reinforced red edges, intended for permanent fencing for horses. 40 times better conductivity than standard 40mm PowerLine Tape. With 11 stainless steel wires 0,16mm and 4 mixed metal wires 0,25mm. Post spacing up to 6m.

007592	40mm - White - 200m	= 1

⚡⚡ TurboLine tape

12,5mm TurboLine Tape. The horizontal wires are interconnected at 13 cm intervals ensuring better conductivity. 40 times more conductive than standard polytape. Ideal for portable electric fences. Post spacing up to 5m. 200m and 400m rolls. Always use TurboLine tape if fence > 500m.

076232	12,5mm - White - 200m	= 1
086231	12,5mm - White - 400m	= 1

⚡⚡⚡ TurboStar tape

TurboStar Tape is a premium 40mm tape which has the lowest resistance available today. It has 40 times better conduction than regular tape and will result in more power on your fence due to 10 stainless steel wires and 4 mixed metal wires. Post spacing up to 6m. The sturdy and breathable features prevent tensioning regularly. Available in white and tera on 100m rolls.

NETTING

Gallagher has wide range of netting for ideal and reliable portable/moveable fencing. Whether you need netting for sheep, chickens, rabbits, cats, dogs or goats, we've got it.

We would also like to introduce you to our ideal fencing for sheep and cattle. The SmartFence 2.0 is our pride and joy - the perfect alternative to standard fencing netting.

NETTING KEY

We have a wide range of netting. Please use the key to find the right netting for you. It enables you to find the specifications of the netting.

For example:

Orange 90/1 W 14/G - 50m
① ② ③④ ⑤ ⑥ ⑦

1. the colour of the netting
2. the height of the netting (cm)
3. 1= single pin
   2 = double pin
4. with a reinforced bottom wire
5. the number of posts
6. the colour of the posts: G=green / W=white / B=black
7. length of netting

EuroNetz Wolf netting

Complete and user-friendly fencing netting to keep out wolves. The netting is 50m long and is 1.20m high. It has 14 posts with a double pin and a reinforced bottom wire to prevent it from being breached by gnawing or chewing. The netting is easy to erect and several nets can be linked together.

| 078677 | Orange 120/2W14/G-50m | 🐝 = 1 |

EuroNetz Wolf netting

Fencing netting to protect your animals against wolves, with a plus/min connection. This means that the wires are connected alternately to the plus and minus pole of the energizer. If 2 wires are touched at the same time, the animal experiences a strong, brief shock. This system guarantees full voltage, even on surfaces where earthing is tricky. The netting has 14 posts with a double pin, it is 1.20m high, 50m long and extremely easy to use.

| 078684 | Orange 120/2W14/G-50m | 🐝 = 1 |

EuroNetz Wild boar netting

Turbo netting against wild boars. Strong posts 19mm, best solution to prevent wild boars destroying your crops. An electric fence in combination with a budget physical barrier.

062973	White 75/1-14/W-50m	❋ = 1	

EuroNetz Poultry netting

Do you have chickens that need to be moved regularly? This chicken netting is the ideal solution. It is user-friendly, complete, and has a total length of 50m. The netting includes 15 posts with single pin that have been incorporated into the netting. Several nets are easy to connect together.
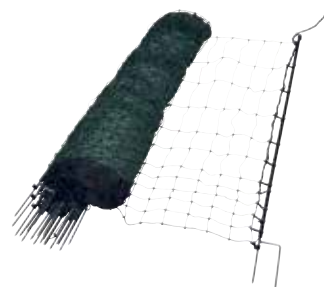

076833	Green 112/2-15/B-50m	❋ = 1

022403	Orange 112/2-15/G-50m	❋ = 1	

EuroNetz Rabbit netting/Hobby netting

Fencing netting for rabbits and other small pets. Can also be used for an allotment or a field. Complete and easy to attach to several other nets. Length 25m, 9 posts.
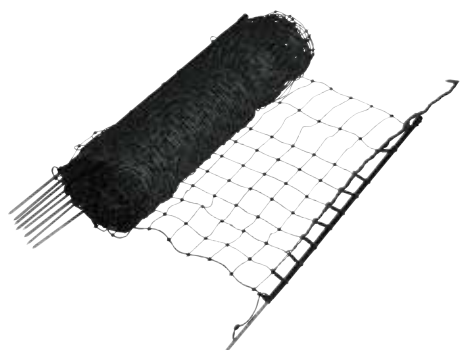

077281	Green 65/1-9/B-25m	❋ = 1	
024377	Green 65/1-15/B-50m	❋ = 1	
022182	Orange 65/1-15/G-50m	❋ = 1	

EuroNetz Goat netting

Complete and easy to use portable netting for goats and lambs. If the pasture is bordered with ditches, netting offers even the newborn lambs maximum safety. Length: 50m.It is easy to connect nets together.

022168	Orange 105/1-14/G-50m	❋ = 1	
022212	Orange 105/2-14/G-50m	❋ = 1	

EuroNetz Gate for electric netting

A gate set for convenient opening or closing of net fencing. Easy to use and to connect to your net fencing.
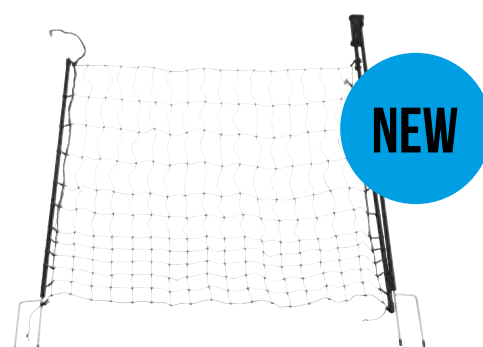

079360	Entry gate	❋ = 1	

NEW

GALLAGHER

EuroNetz Sheep netting

Complete and user-friendly portable fencing netting for sheep and lambs. Also suitable as fencing near ditches so new-born lambs can stay in the pasture in complete safety. Length: 50m. Includes 14 posts with a single pin that are incorporated into the netting. Several nets are easy to connect together.

075379	Orange 90/1-14/W-50m	= 1
022175	Orange 90/2-14/G-50m	= 1

SmartFence 2.0

SmartFence 2.0 is the alternative product for netting. A revolution design where posts, reels and wires are combined into 1 product. Quick and easy to put up.

All in one, four wire, 100m, fully portable instant fence system.

Very quick and easy to assemble and easy to carry and store away.

Can be connected to any energizer for instant electric fence protection.

700007	SmartFence 2.0	= 1

INSULATORS

With our range of insulators we provide a solution for every type of fencing.

Whether you use tape, cord, plastic wire, EquiFence or aluminium-coated wire, Gallagher has it all.
Our insulators stand out in terms of price, quality and durability.

XDI screw-in insulator wood

Improved screw-in insulator with unique advantages over traditional black screwing insulators. Much stronger due to the new technology.

GALLAGHER PATENTED SOLUTION

025510	For (poly) wire and rope	= 25
065059	For (poly) wire and rope	= 75
025527	For (poly) wire and rope	= 125
060788	For (poly) wire and rope	= 250

XDI bolt-on insulator M6x23mm metal

High quality Bolt-on insulator with metal core. The orange ring guarantees an equal distance between the insulator and the conductor. Suitable for (poly) wire or cord on a steel post, like the Termination post (022014/022236). (External thread length 25mm M6 incl. 2xnut, total lenght 33mm).

| 057795 | For (poly) wire and rope | = 10 |
| 079094 | For (poly) wire and rope | = 125 |

Screw-in Insulator Promopack

With metal core. High-quality black plastic. For wooden posts. Suitable for (poly) wire and cord.

PROMO PACK — EVEN MORE ECONOMICAL

| 071074 | Screw-in Insulator in bag | = 100 |

Screw-in insulator super in bucket (175)

High quality screw-in insulator without metal core, therefore no short circuiting possible. For adding a wire to a wooden fence post. Type 009008 also suitable for 12,5mm tape.

PROMO PACK — INCL. 175 INSULATORS

| 079537 | For wire, rope and 12,5mm tape | = 175 |

GALLAGHER

Screw-in insulator wood small

Solid High quality screw-in insulator without metal core, therefore no short circuiting possible. For adding a wire to a wooden fence post.

011209	For wire, rope and 12,5mm tape	= 250

Screw-in insulator wood

Low-priced, high quality screw-in insulator without metal core. Suitable for wooden posts.

060894	For (poly) wire and rope	= 75

Wire clip insulator for Line Post

You need this wire clip if you want to fit fencing wire or cord of up to 8mm (Gallagher EquiFence/permanent cable) to a Line Post. These clips have been developed especially for the Gallagher Line Post.

744346	For wire and rope	= 20

Claw Insulator concrete

Insulator for permanent fencing with flat back for stable fitting on a concrete post. Suitable for HT wire and Vidoflex.

709048	For polywire and wire / black	= 25

W-insulator Small

Made from high density, sunlight resistant polyethylene plastic. Large heavy duty shield eliminates power leakage. Suitable for guiding wire around a corner post.

006734	For polywire and wire / black	= 25
028498	For polywire and wire / black	= 175

W-insulator Super

Made from high density, sunlight resistant polyethylene plastic. Large heavy duty shield eliminates power leakage. Suitable for guiding wire around a corner post.

067612	For rope and Equifence/white	= 25
067617	For rope and Equifence/white	= 175
067605	For rope and Equifence	= 25
021055	For rope and Equifence	= 175

Strain insulator S

Suitable for short strains and semi-permanent short fences. Available in plastic and super strong polycarbonate

011025	For rope and wire / black	= 5
012015	For rope and wire / black	= 100

High Strain insulator Kit with stainless steel rope

Simplest option for end strain insulation. Long life Super Strain Insulator with pre-attached stainless steel rope. Simple install, no wire tying or special tools required. Fits up to 200mm/8" pos

NEW

079483	For rope and wire / white	= 5

Corner insulator Extra High Voltage

Designed for high powered fencing systems and areas where insulation is critical. Insulation ribs provide 2 x the insulation performance of previous models to reduce chances of stray voltage around critical areas. Streamlined design allows for comfortable positioning in hand during installation; the wire can be easily cut away for product reuse

NEW

100002	For rope and wire / white	= 10
100003	For rope and wire / white	= 100

Porcelain strain/corner insulator

A porcelain End-strain Insulator for high tensions.

015139	For wire	= 6
053506	For wire	= 60

Porcelain corner insulator

A porcelain roll-corner insulator to strain the wires on the corner posts.

015146	For wire	= 6
015141	For wire	= 60

Roller screw-in insulator
Innovative Gallagher design. Easy to install. Suitable for poly wire and rope. The special design means the wire always returns to the roll.

029013	For polywire and rope	= 5

Strain insulator S reinforced

Suitable for short strains and semi-permanent short fences. Available in plastic and super strong polycarbonate.

011032	For rope and wire / white	= 5
678023	For rope and wire / black	= 5
012022	For rope and wire / white	= 100
678061	For rope and wire / black	= 100

Roller screw-in insulator

For use with Termination post (022014/022236) or for fixing to a wooden fence post. Only suitable for poly wire.

010707	For polywire	= 5

Clips for Insultimber/Ecopost

We recommend the use of Part.No 011056 for fixing wire to an Insultimber post or Gallagher Ecopost. Use Part.No 011063 with 1 metre droppers. You can tighten the clips using the wire twister (part.no 005232).

997025	Long 150mm/Plastic coated	= 50
011056	Short 100mm / for wire	= 25
024698	Short 100mm / for wire	= 1000
011063	Long 150mm / for wire	= 50
024704	Long 150mm / for wire	= 1000

Roller bolt-on insulator

For use with Termination post (022014/022236). Only suitable for poly wire. External thread length 28mm. M8 incl. 2 x nut.

010714	For polywire	= 5

PowerLine tape insulator

Insulator used to fix 40mm tape to wooden fence post. Can be stapled, nailed or screwed to post. The tape is very easy to fix.

011094	For up to 40mm tape	= 25
040674	For up to 40mm tape	= 125

TurboLine Horse insulator

Insulator with soft faces to lock the tape between two rubber sleeves (patented system). Fixes the tape with 1 click and prevents wearing guaranteeing a long life for your tape. Additional screw can be used to tighten the insulator even more.
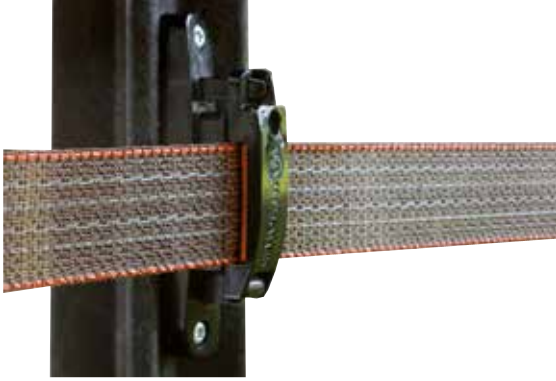

| 699004 | For up to 40mm tape | = 20 |
| 699066 | For up to 40mm tape | = 100 |

TurboLine Horse corner/strain insulator

The new very innovative robust Corner Insulator. Has a lot of advantages compared to the traditional insulators. A unique sub frame for optimal strength and fixation at the post. Pre mounted rubber grip for best tape fixation. Can be installed with only one drill bit. A unique slot to strain and re-strain your tape. The optional metal plate (art. 708027) can be used as a tape connector and gate anchor.

701028	For up to 40mm tape	= 5
701042	For up to 40mm tape	= 30
708027	For 40mm tape / gate anchor	= 5

TurboLine tape insulator

Insulator with soft faces to lock the tape between two rubber sleeves (patented system) to prevent the wear off guaranteeing a long life for your tape.
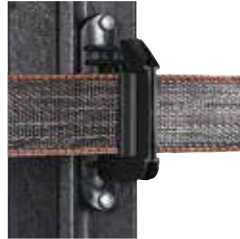

| 011087 | For up to 40mm tape | = 20 |
| 021482 | For up to 40mm tape | = 100 |

TurboLine corner/strain insulator

Corner insulator in high quality plastic which secures the tape between 2 rubber sleeves (patented system), guaranteeing long life for your tape. Use the connecting plate (Part No. 010745) for end (gate) posts to ensure good connection between the tapes.

016702	For up to 40mm tape	= 5
043880	For up to 40mm tape	= 30
010745	For 20/40mm tape	= 5

TurboLine Line Post tape clip

Fast install, easy to use no tools required. Positive locking and quick release to enable re-tensioning of tape. Soft rubber pads lock tape in place to prevent tape movement and fraying.

| 747033 | For up to 40mm tape | = 12 |

XDI offset bolt-on insulator metal 20cm/M6

Innovative Gallagher design. Much stronger than the standard offset insulator due to a new technique, and more durable due to its metal core. The chance of short-circuits is zero. The orange plastic section serves as a wear indicator. (Total lenght 200mm, external thread length 125mm M6 incl. 2xnut/washer).

| 029006 | For (poly) wire and rope | = 10 |

XDI offset screw-in insulator wood 10cm

Innovative design. Much stronger than the standard offset screw- in insulator thanks to a new technique. More durable thanks to its metal core. The chance of short-circuits is zero. The orange plastic section serves as a wear indicator. To be used with wooden posts. Distance 18cm.

| 075904 | For (poly) wire and rope | = 20 |
| 077274 | For (poly) wire and rope | = 100 |

XDI offset screw-in insulator wood 18cm

Innovative design. Much stronger than the standard offset screw- in insulator thanks to a new technique. More durable thanks to its metal core. The chance of short-circuits is zero. The orange plastic section serves as a wear indicator. To be used with wooden posts. Distance 18cm.

028993	For (poly) wire and rope		= 10
042647	For (poly) wire and rope		= 100

XDI offset screw-in insulator wood bended 18cm

High quality offset insulator (18cm) with metal core, helps prevent damage to non-electric fences. The orange ring guarantees an equal distance between the insulator and the conductor. Suitable for (poly) wire or cord.
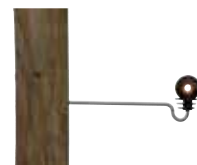

057801	For (poly) wire and rope		= 10
057818	For (poly) wire and rope		= 100

Offset screw-in insulator wood 10cm

Solid high quality offset screw-in insulator (10cm) for wooden posts. Without metal core. Suitable for (poly) wire and cord.

072491	For (poly) wire and rope		= 20

Fence Insulator for pos/neg system

This insulator has been developed especially for fitting on a spacer insulator (item 072491 or 029006). With this combination you can quickly and easily create a plus-minus fencing on your fence to keep cats out or in your garden.

077335	For polywire		= 30

Offset screw-in insulator 20cm

For electrifying non-electric fences quickly and effectively. Distance 20cm. With insulator suitable for wire and rope up to 9mm.

009350	For polywire and rope		= 10

Live Tip offset insulator steel post 16cm

With an electrified tip and zero leakage through the post, the live tip offsets are an effective, new option for protecting existing fences. 10 year product warranty.

006145	For wire and rope		= 20

Offset Pigtail insulator wood 17,5cm

For electrifying specific existing non-live fences quickly. Available in 2 lengths: 17.5cm or 40cm. Very suitable for rope and tape. Pre-drill hole and staple the offset to the wooden post.

010981	For wire and rope / white		= 10
720234	For wire and rope / terra		= 10
010998	For wire and rope / white		= 10
720135	For wire and rope / terra		= 10

Top mount double end Ring Top offset 80cm

With this double-sided offset insulator Ring Top, you can separate adjacent pastures and each fencing has its own current. It means the animals cannot get close.

NEW

Live Tip offset insulator wood 16cm

With an electrified tip and zero leakage through the post, the live tip offsets are an effective, new option for protecting existing fences. 10 year product warranty.

006183	For wire and rope		= 20
006190	For wire and rope		= 20

751528	For wire and rope / white		= 5

GALLAGHER

Offset bolt-on insulator 20cm/M6
For electrifying non-electric fences quickly and effectively. Distance 20cm. With insulator suitable for wire and rope up to 9mm. To be used with steel posts. (External thread length 110mm M6 incl. 2xnut).

007516	For polywire and rope	= 10

Offset Pinlock Insulator wire 30cm

For electrifying existing or run down fences. Easy to fix. 30cm long. Large spark guard. Pin lock for easy installation and removal of wires.

659046	For polywire / black	= 25

Offset Chainlink Insulator cainlink 30cm

For protecting and electrifying chain link netting. The completely galvanized clips are easy to fit to any type of netting. Pin lock insulator makes fixing the wire easy. 32cm long.
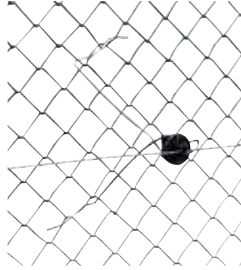

010912	For polywire / black	= 25

Clip Fibreglass post 10mm

Easy to use stainless steel clips for adding an extra wire to the Gallagher Fibre glass post ø10mm.

018300	For 10mm Fibreglass post / inox	= 25

Mounting bracket 40/60mm

Mounting bracket. Fits on every garden wire enclosure. Incl. a connection point (M6 and M8) for insulator 010714/057795/007516 to also protect your garden wire enclosure. Fitted with a rubber insert to prevent damage to the post.

008780	Supports M6 and M8	= 5

Click-on insulator

Adjustable insulator for Spring steel Post (art. 008902/019274).

010752	For Spring steel post	= 10

Screw-on rod insulator open version

For adding extra wire to round portable posts. Ideal for steel pigtail posts.

010950	For 4/10mm post / black	= 20
010936	For 6/14mm post / green	= 20
011230	For 6/14mm post / green	= 250
010943	For 6/16mm post / white	= 10

Clip stainless steel

Easy to use stainless steel clips for adding an extra wire to the Gallagher pvc post 13mm.

003266	Clip for Plastic post 13mm	= 10
063499	Clips for Deer post 19mm	= 25

CONNECTORS

Connectors are crucial in electric fencing. They are relatively small parts, but essential to proper current conductivity. Knotting wire together produces a loss of power, rendering the fencing ineffective. Fitting a good connector represents a minor investment, but you do have perfect fencing!

Vidoflex connector

This stainless steel clamp provides a good conductive connection between polywire. Easy to use.

060764	Vidoflex connector	= 4

Rope connector with wingnut

This stainless steel clamp provides a good conductive connection between Rope or Vidoflex.

075928	Rope connector with wingnut	= 4

Rope connector

This stainless steel clamp provides a good conductive connection between Rope or Vidoflex.

019342	Rope connector	= 4
071159	Rope connector	= 25

Joint clamp

Essential for ensuring there is no loss of conductivity at connections. Effective animal control is dependant on optimum conductivity around the power fence. Heavily galvanized for durability and long life. Suitable for all size wire and rope.

010851	Bobbin round with hex nut	= 10
603568	Bobbin round with hex nut	= 100

Joint clamp angle

Essential for ensuring there is no loss of conductivity at connections. Effective animal control is dependant on optimum conductivity around the power fence. Heavily galvanized for durability and long life. Suitable for all size wire and rope.

010868	Angle with wingnut	= 10
603964	Angle with wingnut	= 100
060498	Angle with hex nut	= 100

Tape joiner

Innovative Gallagher design. For connecting and tensioning tape up to 20mm. Easy to install using the rucksack clasp principle. Now it is easy to connect tension and release tape.

028979	For 12,5/20mm tape	= 5
028962	For 20/40mm tape	= 5

Tape joiner

To be used in combination with part no. 016702 or for joining and/or connect 20/40mm tape. Gives excellent mechanical and electrical connection. Made from non-rusting stainless steel.

| 010745 | For 20/40mm tape | = 5 |

Tape connector

Double connector for connecting two rows of tape. Length cable: 60cm.
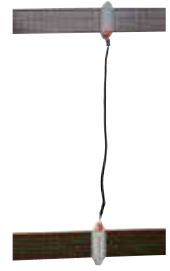

| 055333 | Tape / tape connector 60cm | = 1 |

Tape connector

Single connector for perfect connection from the energizer to the tape fence line. Length cable: 130cm.

| 055340 | Tape / energizer connector | = 1 |

Insulated End Strainer
Kit to easily tension Equiwire or High Tensile using a socket, fork spanner or a tensioner (695303). Eliminates the need for wire knots. May be used on all Gallagher wooden posts. Includes 2 tensioners.

| 618005 | With fastening cable | = 2 |
| 695303 | Handle for tensioner | = 1 |

Clip lock strainer

Clip lock strainers can be placed in the fence line during or after building your fence. For easy straining and re-straining your wires.

| 056095 | Clip lock strainer | = 2 |
| 695303 | Handle for tensioner | = 1 |

Rope tensioner

For easy tensioning of rope. Easy release thumb catch. For use in combination with the roller screw-in insulator. (# 029013) or the strain insulator (# 011025/011032). Comes as standard with a roller screw-in insulator.

| 028955 | Rope tensioner | = 1 |

Tension spring

The tension spring neutralises the tension difference in the wire which is caused by fluctuations in temperature. It keeps the wire evenly tensioned during summer and winter, which means you can double (up to 15m) the distance between the posts. Suitable for 1.6mm and 1.8mm HT wire. Maximum tension strength 85kg. Stainless steel, lenght spring 155mm, Productwarranty 10 Year.
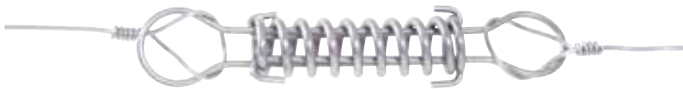

| 004133 | For HT ø1,6mm/1,8mm | = 1 |

Tension spring

The tension spring neutralises the tension difference in the wire which is caused by fluctuations in temperature. It keeps the wire evenly tensioned during summer and winter, which means you can double (up to 15m) the distance between the posts. Suitable for 2.5mm and 2.65mm HT wire and EquiFence. Maximum tension strength 200kg. Stainless steel, lenght spring 345mm, Productwarranty 10 Year.

| 036257 | For HT/EQ ø2,5mm/2,65mm | = 1 |

Wire tensioner

Use of this unique tensioner means that the wire does not have to be cut to strain it. Consequently, the power in the wire will be uninterrupted. Strong, lightweight, rust resistant construction. Can be used to join wires. Also suitable for rope. Excl. Wiretensioner (029044 or 006451).

| 010882 | Wire tensioner | = 3 |

| 021475 | Wire tensioner | = 25 |
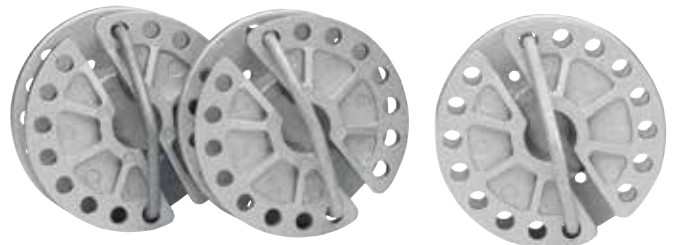

GATES

Gallagher has several options for making a gate. Are you familiar with the Gallagher multi-wire gate set? They are ideal! It allows you to open and close the gate with one hand.

We also have a tough electric gate for permanent fencing.

Multi strand gate kit

The most complete and easy to use all-in-one multi strain electric gate on the market. Provides a low cost gate solution for practically any width gateway. Comes with 40mm tape.

718842	4x 40mm tape terra / 6m	= 1
718040	4x 12,5mm tape white / 6m	= 1
718026	2x 12,5mm tape white / 8m	= 1

Electrified steel gate

Adjustable, maintenance free gate, fully electrified. Suitable for all permanent fences incl. tape. Will fit gates from 2.5m to 4.5m. Height: 1.0m.

| 001064 | Gate width 2,5m up to 4,5m | = 1 |

Drive thru Electro gate

A complete gate which can be erected anywhere where you have to drive frequently through a gate. Vehicles can push the gate open and the spring loaded gate closes automatically.

| 004164 | Gate width 3,7m | = 1 |
| 054923 | Gate width 5,0m | = 1 |

Batt-Latch Gate Release Timer

Automatic gate opener, including self-closing gate spring. This system is ideal for opening a gate at a pre-set time. Extremely suitable for dairy farming and strip grazing. The system works on a battery with support from solar panels, ensuring the battery lasts longer.

| 077441 | Automatic gate release | = 1 |

Retractable auto reel white

Elastic rope gate set

Complete gate set (conductive cord, white), to quickly and easily create a passage in a (cord) fence. Easy to open and close by pick up the gate handle in or out of the included gate handle anchor. Suitable for gate passages starting from 3 up to 6 meters wide.

Elastic rope gate set / 2 gate handles

Set to create a gate using elastic conductive rope (white). This rope with a length of 6½m can be stretched to create a gate of up to 11m. Fence can be opened from either end. Includes 2 gate handles attached to the elastic rope and 2 unique Gallagher gatehandle anchors.

016412	Gate width 3 up to 6m / white	= 1
072354	Gate width 3 up to 6m / terra	= 1

640556	Gate width 6,5 up to 11m / white	= 1

Spring gate set

Adaptable, gate closure. Complete set, maximum width 5 m. Not recommended for use with horses.

009084	Gate width 5m		= 1
016405	Gate width 5m / white spring		= 1

Retractable auto reel

Gate system with retractable reel, it automatically rolls and unrolls a walk way up to 15m. Simple to install and easy to handle. Comes complete with gate handle and multi directional mounting bracket. Available in white and terra.

010844	Gate width 15m / tape 40mm white		= 1
054954	Gate width 15m / tape 40mm terra		= 1

Dual Purpose Portable handle

The new Dual Purpose Handle provides the flexibility with extra secure connection points, enables farmers to liven the fence from either the reel or handle end. By tying a loop in the wire, tape or braid it can be attached easily to the eye in the handle. "Ring Top" design connection hook ensures that the handle will not bounce off the fence wire. The moulded hand grips indicate where to place hands to avoid getting a shock. The handle is made from durable UV resistant material.

NEW

738321	Dual purpose handle		= 6

Insulated Portable handle

Using the innovative Ring Top Post design connection hook ensures that the handle will not bounce off the fence wire. And the design provides an easy retrieval through pasture when winding in. The moulded hand grips indicate where to place hands to avoid getting a shock. The handle is made from durable UV resistant material.

NEW

737324	Portable handle for reel		= 6

Soft touch gate handle

New strong gate handle in orange with black rubber accents for an optimal grip and excellent visibility. 697000 for cord or wire, 696003 with tape buckle 40mm.

697000	For rope and wire / orange / Inox		= 1
055722	For rope and wire / orange / Inox		= 4
057979	For rope and wire / terra / Inox		= 1
058198	For rope and wire / terra / Inox		= 4

Soft touch gate handle

New strong gate handle in orange with black rubber accents for an optimal grip and excellent visibility. 697000 for cord or wire, 696003 with tape buckle 40mm.

696003	For tape / orange / Inox		= 1
055715	For tape / orange / Inox		= 4
057986	For tape / terra / Inox		= 1
058204	For tape / terra / Inox		= 4

Gate handle

Heavy duty, durable gate handles in black and orange. Good visibility and large protective shields. 007585 has a compression hook for easy use. 010769 for attaching tape to a gate handle.

010776	Basic gate handle / orange	= 1
010783	Basic gate handle / black	= 1
007585	Gate handle with N-hook / black	= 1
010769	Gate break joiner for 40mm tape	= 4

Compression gate handle

Gate handle with compression hook for easy use.

PROMO PACK — EVEN MORE ECONOMICAL

072408	Gate handle with N-hook / black	= 10

Gate handle anchor

For connecting a gate handle, with galvanized joining plate. We recommend the use of wire clamp (part no. 010851) to guarantee an optimum connection.

010905	2-way / screw-in	= 4

Gate handle anchor

Gate anchor with 3 anchor points for Gallagher gate handles, ideal in multi-paddock situations. Power connects to bolt from below the plate. Comes with the 3mm galvanized plate.

021451	3-way / screw-on with leadout conn	= 4

Gate handle anchor
Innovative Gallagher design. For attaching a gate handle. Stronger than all other gate handle anchors thanks to the new technique. Made of high-quality materials. Includes connector option for 1,6mm earth cable.

028986	2-way / screw-in with leadout conn	= 5

Gate handle anchor

Innovative Gallagher design. Anchor to attach a gate handle to steel posts. Stronger than all other gate handle anchors thanks to the new technique. Made of high quality materials.

060658	Bolt-on with leadout conn	= 5

Gate handle anchor

For connecting a gate handle.

010738	2-way / screw-in / basic	= 4

EARTHING

Earthing ensures that the current can flow back to the energizer as soon as an animal touches the fence. No earthing means no current on the fencing, which is essential to good fencing!

Bentonite

Earthing can be achieved simply and quickly with this mix, even in extremely dry conditions. The mixture of salt and absorbent clay retains moisture and increases the conductivity of the surrounding soil. To be used in poor earthing conditions and in combination with more powerful energizers. Excl. earth stake.

008773	Super earthing mix (6kg)	= 1

Lead out cable XL

XL wire coated with a heavy duty double insulation. Good quality polyethylene for abrasion resistance in the ground. 2,5mm medium tensile aluminium coated wire 4 times the conductivity of 2,5mm galvanized wire. Ideal for carrying power long distances underground. For use between earth stakes.

016276	2,5mmXL-200m-8Ohm/km	= 1

Lead out cable

Double insulated lead-out cable to connect the energizer with the fence and to make underground connections (e.g. gateways). Use this cable for short distances. For distances over 30m use 2.5mm cable.

065028	1,6mm - 10m - 100 Ohm/km	= 1
066097	1,6mm - 25m - 100 Ohm/km	= 1
021604	1,6mm - 50m - 100 Ohm/km	= 1
065011	2,5mm - 25m - 35 Ohm/km	= 1
062712	2,5mm - 50m - 35 Ohm/km	= 1
021611	2,5mm - 100m - 35 Ohm/km	= 1
162713	2,5mm - 400m - 35 Ohm/km	= 1

Earth stake

Without a proper Earth System your energizer will not perform . Always use galvanised earth stakes. Battery Energizers: Earth Stake length 1m c/w clamp.

029037	2m with earth clamp	= 3
029020	1m with earth clamp	= 3
008735	1m without earth clamp	= 1
044030	Earth clamp	= 1

Earthing accessories

Earth clamp: guarantees a good connection between the earth stakes and lead-out cable from the energizer. Lead out joint kit: for a secure, waterproof connection of lead out cable without power loss.

044030	Earth clamp	= 1
063796	Lead-out connector	= 2
044023	Earth socket	= 1

REELS AND TOOLS

Reels are used for portable fencing to wind or unwind the fencing wire. It can be fixed with the reel corner post to produce a strong construction.

If you are going to put up electric fencing you simply need the right tools. Whether you need to tension High Tensile fencing, cut wire, or screw down insulators, the job is simple when you use Gallagher tools.

Reel 200m

Low cost convenient plastic reel with ratchet for 200 metres of polywire.

008933	Reel 200m	= 1

Reel 400m
Convenient plastic reel with ratchet for 400 metres of polywire. Detachable drum.

008919	Reel 400m	= 1
009145	Spare drum for reel 400m	= 1

Econoreel 500m

A strong and durable reel with ratchet mechanism for winding up and unwinding polywire. Suitable for up to 500m polywire. Equipped with insulated handle. Hooks directly to fence or use Reel Stand.

046167	Econoreel 500m	= 1

Geared reel 500m
Equipped with an accelerator mechanism so the drum rotates three times faster than standard reels. Carry handle with knuckle guard. Locking ratchet. Long crank arm for better leverage. Wire loop for connecting power to wire/tape. Holds up to 500 metres of polywire or 200 metres of tape. Attachable to Reel Stand.

061139	Geared reel 500m	= 1
061115	Medium reel 500m	= 1

Large geared reel 1200m

Heavy duty gearbox for easy winding, fast wind in (2.7:1). Large comfortable hand grip with knuckle guard for safer use.
Holds: 400m 12.5mm TurboLine tape, 400m 12,5mm PowerLine tape, 1000m Vidoflex 9 or
1200m Vidoflex 6.

| 016313 | Large geared reel 1200m | = 1 |

Triple Geared Reel Stand pre-installed

Triple Geared Reel Stand with 4.0m Vidoflex polywire.
Pre-assembled with post and three pre-wound Geared Reels (061139).

Post height 1070mm and reels are pre-wound with 400m Vidoflex polywire.
Suitable for containing all types of animals.
Multi reel connector (006345) available separately.

| 633046 | Incl. 3 Geared reel and rope | = 1 |

Reel/Termination post

Reel/Termination post for portable fences. Holds up to three grazing reels or insulators. Galvanized steel Tread-in foot peg. Add the support bracket for additional structural support.
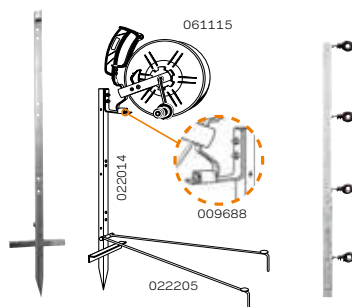

022014	Supports 3 reels/insulators - 1,25m	= 1
022236	Supports 4 reels/insulators - 1,85m	= 1
009688	Reel bracket	= 4
022205	Support leg	= 1

Multi reel connector set
Insulated lead for connecting power to multi reel system. UV resistant insulated plastic clips. Stainless steel jaws for long life.

| 006345 | Multi reel connector set | = 1 |

Wire dispenser
Ideal for running out or winding up all types of wire. Fully galvanized for long life. Easy to use.

| 011018 | For fencing wire | = 1 |

Farmer pliers

| 004140 | Farmer pliers | = 1 |

Gallagher pliers

| 005225 | Gallagher pliers | = 1 |

Wire twister
With this wire twister, you can twist the wire clips around a wire without a problem. Ideal for use with Insultimber/Ecopost fences.

| 005232 | Wire twister | = 1 |

GALLAGHER

Drill chuck Basic

Support to easy mount almost the entire range of Gallagher ring and screw insulators with your battery drill. (Not suitable for 057801, 057818, 009350 and Screw-in Insulator Super)

| 053933 | Drill chuck Basic | = 1 |

Post holer 75mm

Low cost and easy to use tool for installing soft wood posts. Using the postholer makes fencing easy and prevents the post from getting damaged when using a sledge hammer. Two diameters.

| 704644 | For 75mm posts | = 1 |
| 704668 | For 100mm posts | = 1 |

Drill chuck Pro

Support to easy mount almost the entire range of Gallagher ring and screw insulators with your battery drill. (Not suitable for 057801, 057818 and 009350)

| 077397 | Drill chuck Pro | = 1 |

Screw-in Tie Down

NEW

The Screw-in Tie Down anchors the Line Post to the ground in surfaces with hills and hollows. Fast and easy to install, using the handle for the screw in tie down. (SKU:006161)

| 106151 | Screw-in Tie Down | = 5 |
| 006161 | Handle for Screw-in Tie Down | = 1 |

Rammer

Indispensable for driving Insultimber posts to correct depths without damaging posts. Prevents posts from standing out of line.

530031	Sleeve for Line Post Rammer	= 1
540016	Line Post Pilot	= 1

Line Post Accessories

Line Post Post lifter to easily pull out the Gallagher Line Post.
Handy tool designed specifically for the Gallagher Line Post.

| 527017 | Line Post Lifter Adapter | = 1 |

Universal post Lifter

Post Lifter, suitable for the Line Post lifter adapter To easily pull out the Gallagher Line Post.

| 527000 | Universal Post Lifter | = 1 |

Wire tensioner

Tool for installing ratchet tensioners in fencing.

| 029044 | Wire tensioner basic | = 1 |
| 006451 | Wire tensioner pro | = 1 |

Gallagher Screws

Self drilling torx screws 4,5x40 with cylinder head. The special red wax layer makes pre-drilling unnecessary. T25 Screw bit included.

| 050000 | 4,5x40 T25 (200) | = 200 |

POSTS

Gallagher has two types of posts - posts for temporary fencing and posts for permanent fencing. The permanent posts - Gallagher post, Ecopost and Insultimber post - differ from each other in terms of quality, sustainability and price. We also have portable posts in various types and sizes, including plastic posts, fibre-glass posts and metal posts. Each type has its own application.

Insultimber (FSC®)

Unique insulating posts where the use of insulators isn't necessary. Maintenance free. Long life time. 10 years guarantee.

No insulators required

Self insulated wooden posts for permanent fencing

Maintenance free

FSC® hallmark.

Long life - up to 30 years, with a 10 year guarantee

Eco post

Plastic Eco Post, made from 100% single source, recycled material (polypropylene). The material together with the cross-shaped section (Ø 70mm), guarantees the strength of the post. No insulators needed. Up to 70% more cost effective than traditional (non-electric) fencing.

AWARD WINNER - THE INSULATED LINE POST

AWARD WINNING

EASY TO USE

Gallagher Insulated Line Post

Gallagher Insulated Line Post (1.50m), unique and durable design and extremely suitable for permanent fencing. Full self-insulating and extremely quick and easy to set up. The conductor can be attached to various pre-shaped positions with LinePost Clips that are available separately. Product warranty: 10 years. Lifespan: 25 years or more!

PATENT

1,50M NEW

742335	Insulated Line Post 1,50m	= 10
742212	Insulated Line Post 1,35m	= 4
742014	Insulated Line Post 0,95m	= 4

Gallagher Insulated Line Post Dropper 0,95m

The Line Post Dropper is a floating post that keeps the fencing between two posts at the right height and properly tensioned. Instead of three posts over 12 metres of fencing, you only need two posts if the Dropper is used. A Dropper is cheaper than a Line Post, which cuts the total fencing costs.

SAVE 30%

Wire clip insulator for Line Post

You need this wire clip if you want to fit fencing wire or cord of up to 8mm (Gallagher EquiFence/permanent cable) to a Line Post. These clips have been developed especially for the Gallagher Line Post.

744346	For wire and rope	= 20

TurboLine Line Post tape clip

Fast install, easy to use no tools required. Positive locking and quick release to enable re-tensioning of tape. Soft rubber pads lock tape in place to prevent tape movement and fraying.

747033	For up to 40mm tape	= 12

SUPER-EFFICIENT FENCING SOLUTION

My search for a durable, simple but proper solution for my fencing brought me to the Line Post in April this year. Now I can't stop going on about it!

Convenience

I erected the fencing together with the dealer, but it was so simple I could have done it on my own; that was never possible with my wooden fencing. The usage and installation convenience saves costs too - I need fewer posts, which is what I wanted, so mowing is easier. I can also move and reuse the posts myself, without needing help.

Strong and flexible

If I accidentally hit a post during mowing with my previous fence, that was the end of post. A Line Post can take a knock, bends and simply stays intact, perfect! I imagine that this flexibility is safer for animals too. Finally, a Line Post is extremely thin and doesn't disrupt the view.

Easy to modify

Although it is permanent fencing, it is easy to modify. That's possibly the biggest benefit of all. I just click more wires onto it that can be put at any height with the convenient clips. Ideal if you need to change the types of animals inside the fencing!

Jonny Davison
Farmer

Screw-in Tie Down

The Screw-in Tie Down anchors the Line Post to the ground in surfaces with hills and hollows. Fast and easy to install, using the handle for the screw in tie down. (SKU:006161)

A PORTABLE POST FOR ANY SITUATION!

Light and easy to move

Gallagher also has portable posts in various types and sizes, including plastic posts, fibreglass posts and metal posts. They are all light-weight and easy to move. For example, we have plastic posts with wire holders so you do not need any loose insulators. The tread-in post has been developed specifically for portable horse fencing. You can take 50 of these smoothly finished posts in one hand when you fence off your pasture. You already know the spring steel post with pigtail insulator.
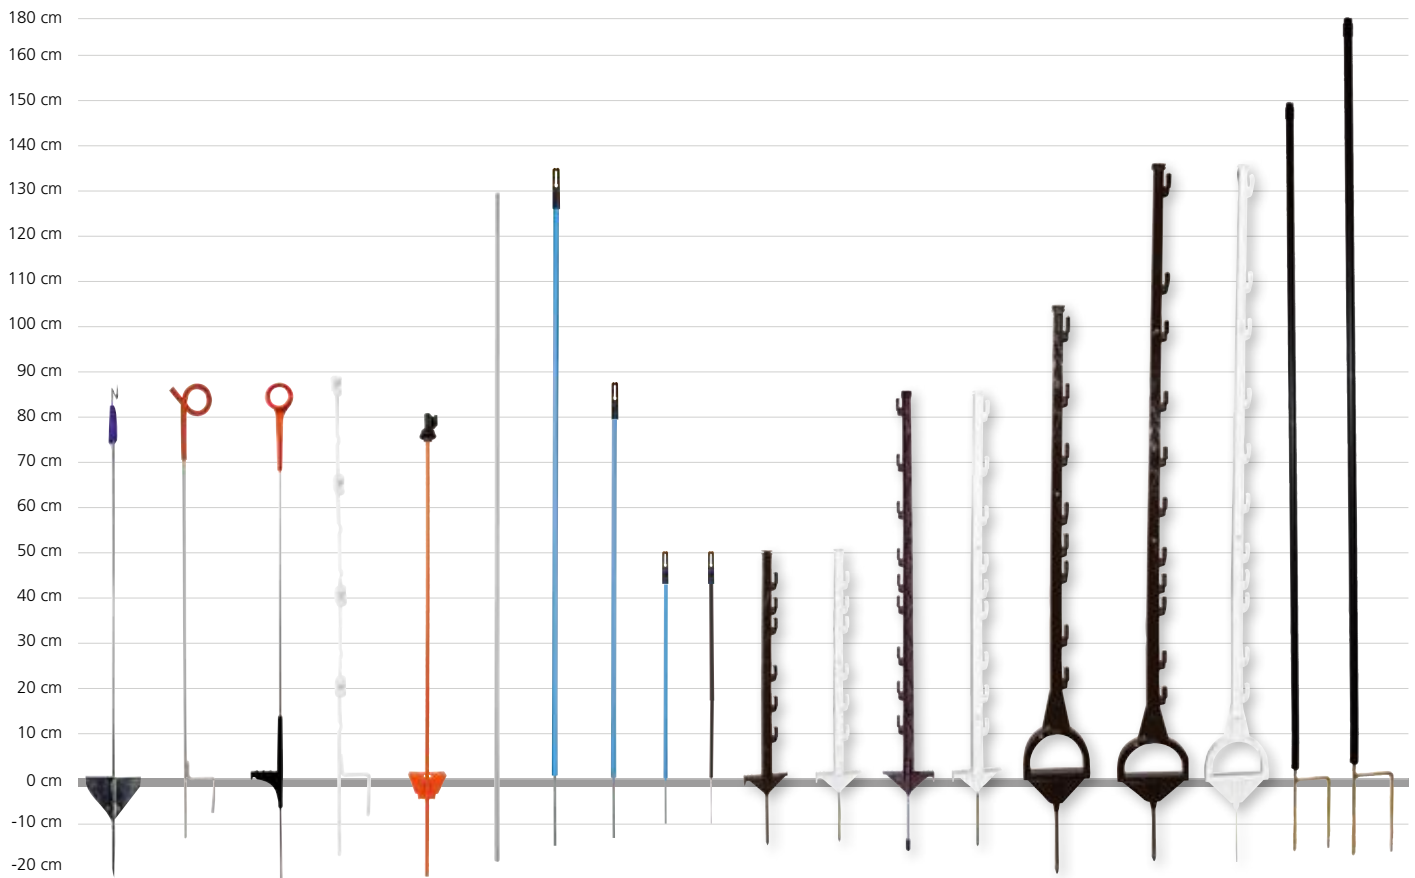

Ring Top post

The most popular option for dairy and beef cattle, practical design for stronger posts, no tangling and better grip in the ground.

PATENT
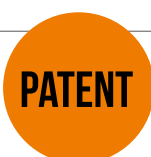

Super tough overmoulded GF nylon head eliminates shorting and prevents wearing through

Easy to use and install even in hard ground.

Long insulation sections strengthen shaft and provide insulation when handling to prevent shocks

Tough unbendable foot plate can withstand 200kg of pressure

GALLAGHER

GALLAGHER WOLF FENCING

Wolves are back after an absence of 150 years and farmers fear for their livestock. Over the past months there have been several reports of farmers who came across dead animals that are likely to have been the work of wolves. Farmers receive partial compensation for the damage and the advice is to protect cattle, and sheep in particular, against wolves. Gallagher offers a number of special wolf-fencing concepts and will advise you without obligation; for more information please visit our website or contact us for customised advice.

GALLAGHER'S ADVICE FOR PORTABLE WOLF FENCING

A - Wolf netting 1.20m plusmin

Complete netting, all-in-one solution for wolf fencing. The netting is 50 metres long and 1.20m high. In total there are 14 posts with a double pin to ensure it stays strong. The bottom wire is reinforced, which extends its lifespan. This special wolf netting is a plus-minus system, meaning that the conductors have alternating plus and minus wires. If a wolf comes into contact with 2 wires at the same time, the animal receives a strong shock and that is how the system keeps wolves out. The advantage is that it is very easy to put up and take down; extremely suitable for flocks that are moved regularly.
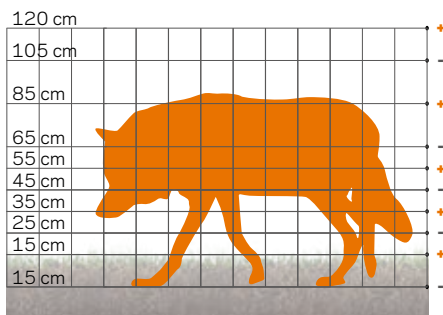

B - Smartfence with Fox light

This unique Gallagher fencing concept is for sheep and goats, but also works to keep wolves out. This all-in-1 system comprises reels, wires and posts. You pull out the fencing as easy as a tape measure. Quick, easy and convenient to put up and take down. Typical for Gallagher and unique. The wire distances from the ground: 15cm – 30cm – 50cm – 70cm and optional 90cm. When you use this solution to keep wolves out, we recommend you use one fox light per Smartfence, as the random light signals frighten off the wolves at night. With 1 Smartfence you can fence off 100 linear metres.
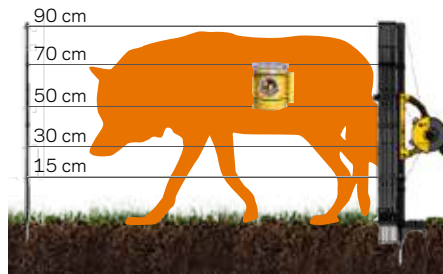

C - Portable Gallagher system

The most effective system for keeping wolves out is permanent fencing, but portable 5-wire fencing is the next best option. Gallagher has a unique solution that consists of blue plastic posts, blue wire and a reel system. The blue plastic posts are typical Gallagher and are easy to carry - as many as 50 in one hand! The blue wire is of excellent quality and has extremely good conductivity. The 4-wire reel system ensures convenience when the wires are unwound or wound back on. We recommend signal tape (no current) as top wire or 12.5mm blue electric tape for even more security.
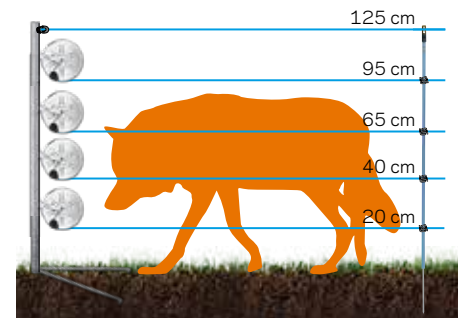

GALLAGHER'S ADVICE FOR PERMANENT WOLF FENCING

To make your permanent fencing suitable for keeping out wolves, Gallagher recommends permanent High Tensile fencing, which has proven to be safe against wolves in Germany for example.

The unique Gallagher post with a fence hight of 1.35m (item no 742212) is ideal for permanent wolf fencing. This flexible and durable post fits in with any landscape and can be inserted without heavy tools. Comes with convenient clips for fixing the wires at the right heights. With a 10-year Gallagher warranty. We would be pleased to provide a quotation without obligation.
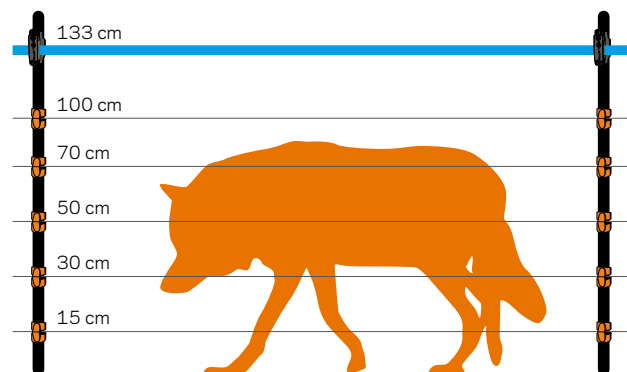

Tip: if you would like to be completely sure?
Gallagher recommends double fencing, as this creates an additional barrier. Suitable for isolated areas.

Visit www.gallagher.eu for even more information about wolf fencing

HOW DO I INSTALL MY FENCING?

For properly operating permanent fencing you are looking for durable materials that you can use for many years. It is equally important to make sure this permanent fencing is erected properly. We are pleased to explain the basic principles of how to build permanent fencing. For more comprehensive information, please visit www.gallagher.eu
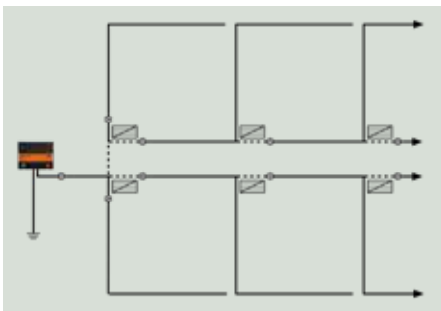

1. Prepare a plan

2. Determine the correct wire height (p. 79)

3. Put up the corner posts

4. Put up the intermediate posts

5. Tension the fencing

6. Fit the energizer and earthing

GALLAGHER

WIRE HEIGHTS

The height of the wire and the number of wires needed depends on the type of animal. Please find below our advice per type of animal.
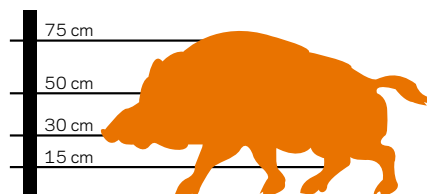

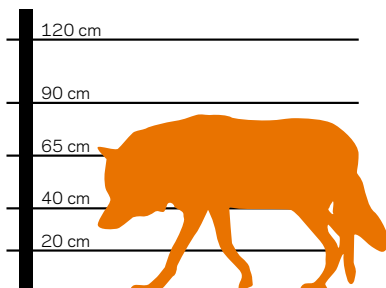

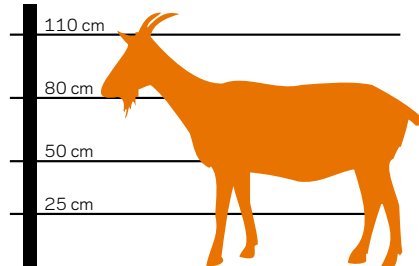

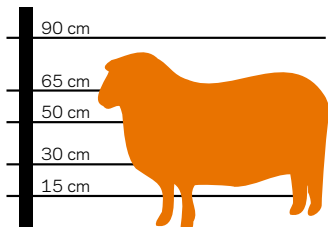

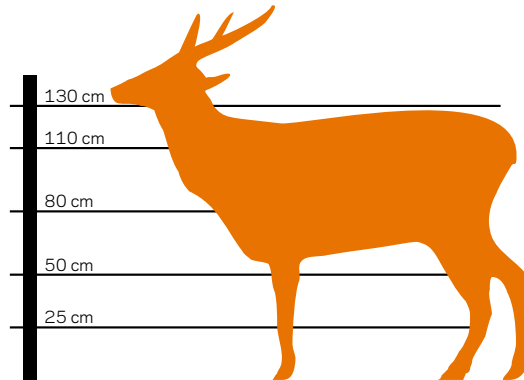

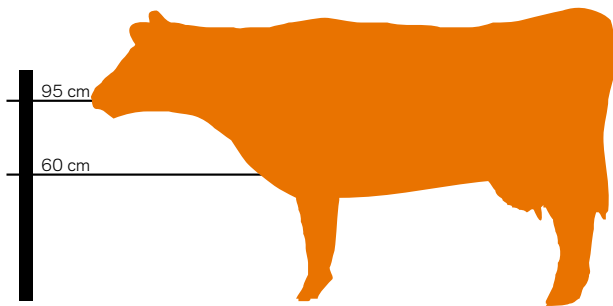

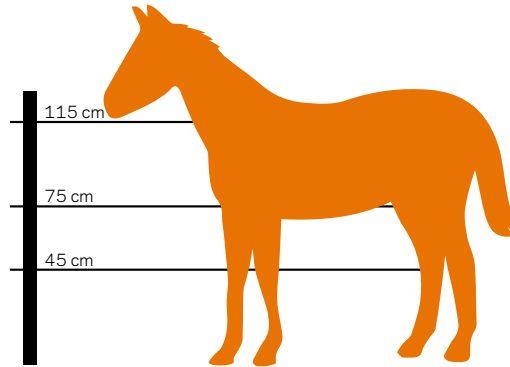

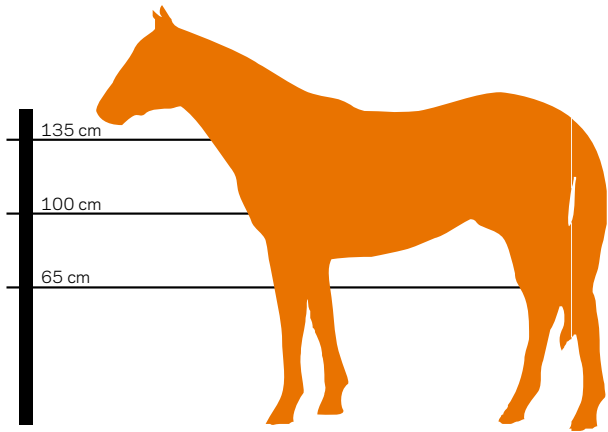

PREPARE FOR THE GRAZING SEASON,
DO THE GALLAGHER CHECK!

We know from experience that a well-fitted Gallagher electric fence can last for as long as 30 years. We have developed the Gallagher Check to help you extend your electric fence's life - by regularly inspecting the fence, and doing a bit of maintenance when necessary.

1. Check your electric fence energizer

2. Check the voltage on your fence

3. Check your fencing

4. Check your earthing

It goes without saying that all these steps are explained in detail in the Gallagher Check video. This is available at www.gallagher.eu or our YouTube channel.

Go to www.gallagher.eu for even more installation advice
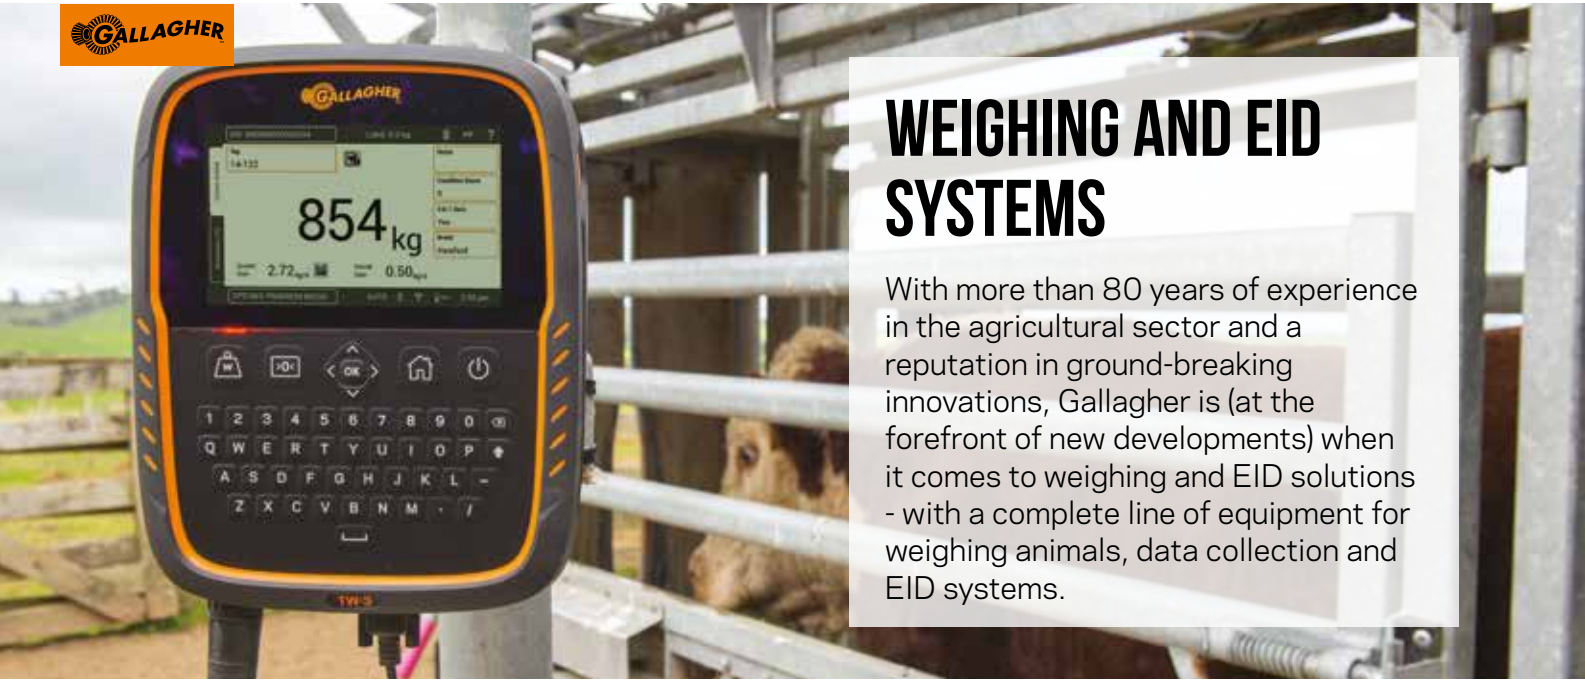

WEIGHING AND EID SYSTEMS

With more than 80 years of experience in the agricultural sector and a reputation in ground-breaking innovations, Gallagher is (at the forefront of new developments) when it comes to weighing and EID solutions - with a complete line of equipment for weighing animals, data collection and EID systems.

The revolutionary TWR-1 and TWR-5 are making the entire Weighing and EID system faster and simpler than ever before.

A market-first integrated EID reader simplifies the weighing process, making animal data collection easier.
